following the success of the fourth edition which was highly commended in the primary health care category for the 2018 british medical association bma medical book awards this fifth edition has been substantially revised and updated to reflect significant changes in health care practice and to incorporate the explosion of information since the advent of the fourth industrial revolution and the covid 19 pandemic as before the book covers target organ systems that can be affected by hazardous exposures in traditional industries and modern workplaces both of which coexist in different parts of the world and present unique occupational health challenges for the medical practitioner to this end this reference textbook focuses on the clinical presentations investigations and medical and work centric management of affected individuals we have retained consideration of some special issues relevant to occupational medicine practice in this new edition and included a new section relating to the multidisciplinary nature of occupational health practice the main emphasis continues to be prevention of disease and early detection of health effects caused by work exposures this edition of the book has been updated to include new information and references we have kept some of the previous case studies and illustrations and introduced several new ones some of which reflect the changes of practice due to the covid 19 pandemic for example in risk communication recognition and management of the risks of health care and frontline work we have again asked international experts in occupational medicine and cross disciplinary medical specialties to jointly author many of the chapters some of the authors are from asia and others from europe the united states united kingdom and australia all the authors have either clinical and or academic experience in or related to occupational medicine practice the book is targeted at all those who are interested in the interaction between work and health and how occupational diseases and work related disorders may present and be managed it will be of interest to medical practitioners especially those in primary care and doctors intending to pursue a career in occupational medicine it would also be relevant for allied health and safety professionals wanting to know more about health effects resulting from occupational exposures other groups who may find this edition useful as a ready reference are medical students occupational health nurses or clinical specialists in diverse fields such as dermatology respiratory medicine infectious diseases or toxicology

latest edition textbook of occupational medicine practice 4th edition this book provides a link between occupational health and clinical practice it aims to provide a valuable starting point for health professionals with an interest in occupational medicine as well as those intending to specialize in occupational medicine it will also serve as a useful guide for all those who are interested in occupational medical practice these include medical students at various levels occupational health nurses general practitioners or colleagues and professionals in occupational health and safety in other words for all who have committed themselves to do the best practice for the health of working people this third edition of the textbook has been fully revised and includes new materials and chapters the contents of the book have been streamlined to appear in two sections the approach of examining occupational health issues and concerns from the standpoint of clinical presentations of the different organ systems is retained these clinically oriented chapters form section one section two comprises issues of special interest to occupational health practitioners such as screening and routine medical examinations assessment of disability for compensation medical planning and management of industrial disasters occupational medicine practice and the law and the prevention of occupational

diseases several changes have directly resulted from feedback from readers of the previous editions among these are the inclusion of new chapters on occupational infections metabolic disorders and occupational medicine practice and the law as before case studies have been incorporated in the chapters to make clear the relevant issues

latest edition textbook of occupational medicine practice 4th edition this book provides a link between occupational health and clinical practice as such the book is suitable for medical students general practitioners and postgraduate students in occupational medicine other occupational health practitioners and occupational health nurses will also find this book useful the main approach of most chapters is to examine occupational health issues and concerns from the standpoint of clinical presentations of the different organ systems e g respiratory disorders musculoskeletal disorders dermatological disorders the book also contains chapters on screening and routine medical examinations health promotion at the workplace assessment of disability for compensation medical planning and management of industrial disasters and the prevention of occupational diseases further case studies have been incorporated in the chapters to make clear the relevant issues the contributors to the book are a mix of international and regional occupational health specialists and clinicians this book will be a valuable starting point for the health professionals with an interest in occupational medicine as well as to those intending to specialize in occupational medicine

the text is generally very readable the scientific quality of the content is above reproach and the content is very comprehensive within the confines of the size of the actual book in my opinion the book meets the needs of the varied targeted audience and i would regard it as good value for money i would consider the book useful for occupational practitioners particularly those in training who would gain a global perspective on many of the issues of occupational medicine journal of occupational medicine this fourth edition continues to provide a link between occupational health and clinical practice it covers target organ systems that can be affected by hazardous exposures in workplaces and it focuses on the clinical presentations investigations and management of affected individuals we have retained consideration of some special issues relevant to occupational medicine practice in this new edition the main emphasis continues to be prevention of disease and early detection of health effects this edition of the book has been updated to include new materials topics and references we have retained a few of the previous case studies and illustrations and introduced several new ones there are new chapters on audit and evidence based practice and on occupational cancer we trust that this edition addresses many of the recommendations that were provided by readers of the previous edition we have again asked international experts to author many of the chapters some of the authors are from asia and others from the us uk the middle east and australia all the authors will have either clinical or academic experience in occupational medicine practice the book will be of interest to medical practitioners especially those in primary care and doctors intending to pursue a career in occupational medicine it would also be relevant for non medical health and safety professionals wanting to know more about health effects resulting from occupational exposures other groups who may find this edition useful as a ready reference are medical students occupational health nurses or clinical specialists in fields such as dermatology respiratory medicine or toxicology the book is

targeted at all those who are interested in the interaction between work and health and how occupational diseases and work related disorders may present related link s

why i became an occupational physician and other occupational health stories brings together an edited collection of the short articles published in the journal occupational medicine between 2002 and 2018 the articles originally appeared as fillers commissioned to literally fill the blank spaces at the end of the main scientific papers but they soon became a feature in their own right written by doctors working in occupational medicine and health the fillers began as a series of pieces exploring the varied and often surprising reasons why the individuals chose to pursue this unique speciality whether it was a natural career move triggered by a specific event or stumbled upon by chance over time the articles became much broader in their scope and the journal began to attract pieces from some brilliant writers mike gibson john challenor nerys williams and of course the superlative anthony seaton amongst many others each article offers something different a peek into history a humorous adventure a quiet musing or a thought provoking observation but all are tied together under the umbrella of occupational medicine a speciality that is often little known or understood in the wider world of medicine this book brings together over 15 years worth of fascinating and diverse articles into one volume for the first time giving a rare insight into the world of the occupational physician

this book is designed to help candidates prepare for the mcq part of the diploma in occupational medicine exam the first 150 questions along with their answers and explanations are designed to help readers check their understanding this section of the book is broken down into the core subject areas on which you will be tested ethics and the law effects of work on health principles of occupational health clinical occupational health health and safety at work the book also contains a complete mock practice exam of 60 questions together with answers and commentary these questions follow the style of those in the exam and will help fully prepare candidates by allowing them to develop an understanding of how the exam questions work written by a gp registrar and winner of the faculty of occupational medicine s mobbs fellowship who recently passed the exam and checked for accuracy by a consultant in occupational medicine this book is the ideal revision and practice guide for exam candidates from reviews as a recent doccmmed candidate i consider this book to be a useful reference for those preparing for the written part of the diploma examination it would be an excellent investment for anyone preparing for the exam occupational medicine april 2018
