with adults over sixty becoming an ever increasing proportion of the global population the challenge of accommodating the needs preferences and abilities of this heterogeneous population has increased one such method is with robots which can be used to support everyday activities for older adults and enhance their quality of life older adults have been found to be quite open to the idea of interacting with robots albeit with preferences for the nature of the task they want the robots to do this book provides a comprehensive state of the art review of the topic of designing robots for older adults this book translates research on aging human factors and human robot interaction hri into guidance that will be usable for practitioners who design robots for a range of applications it offers a framework for hri with a focus on personal characteristics robot functionality task demands and interaction context the application of this hri framework for older adults provides the basis for the book it covers the fundamentals of aging a review of the different types of robots available now and in the future the known facilitators and barriers for adoption and the potential of robots for different everyday activities including social engagement health and wellness home maintenance and security throughout the authors emphasize the need to follow fundamental human factors processes and participatory design approaches that engage older adults in the design process thus allowing the reader a thorough and contemporary understanding of robots as an essential future for assisting an aging population designing robots to improve quality of life for older adults is intended for a broad professional audience especially the design community gerontologists and human factors ergonomics practitioners it will also be suitable for students at the undergraduate and graduate level as a supplementary textbook for courses in human factors design for aging and hri

older adults spend a large part of their lives in their homes and carry out important tasks within them according to social determinants of health the built environment is one of five topics that affect health and quality of life with population aging coming into focus designing safe home environments for older adults is a topic of serious discussion the physical characteristics of the environment have a direct impact on the comfort and confidence of users and can significantly influence the aging process this book addresses the key issues to consider when focusing on the design for safe and comfortable living

for older adults presenting design strategies for housing environments for older adults based on the concepts of aging in place human factors and safety it covers topics such as activities of daily living independence autonomy and dependence risk factors for falls types of environmental adaptations and safe housing design solutions are offered and each housing space reveals explanations and ideas for improving activities for residents split into two sections the book takes a theoretical approach that provides notes about important concepts that need to be learned before starting the project or adapting a housing environment it then shows the practical measures that are necessary to be implemented in environments based on the level of safety the reader will obtain a full and thorough knowledge of the key design considerations to deliver retrofits and new ideas to existing properties designing safe housing environments for older adults is an ideal read for professionals in the fields of health and safety ergonomics and human factors designers civil engineers architects and interior designers

crossing disciplinary and chronological boundaries this volume integrates text and image essays and object pages to explore the processes inherent in gender representation rather than resituating women in particular categories or spheres as other scholarly publications and exhibitions have done taking its lead from the picturing women project on which it reflects and builds the volume makes a substantial methodological contribution to the analysis of gender discourse and visibility it offers new and stimulating scholarship that confronts historical patterns of representation that have defined what women were and are seen to be and presents new contexts for unveiling what art historian linda nochlin has called the mixed messages of representations of women

breaking away from the centuries long theological tradition dmitry usenco offers a radically new semiotic reading of spirituality proceeding on his original theory of the initial cultural unity that embraces language technology and religion african traditional religion comes into focus as a valid alternative and in the long run an equal partner to christianity in the creation of a modern pluralistic society while the author s concepts and conclusions may seem controversial to some none of the readers can discard them as irrelevant africa s future will in many respects depend on her ability to preserve her

cultural heritage in which religion plays a crucial part
