choosing selecting a path when reason cannot show which way to go choosing pervades out lives nourished by evolutionary roots that stretch back 4 000 000 years it activates freedom and indexes social openness and only the person who chooses can mature one who chooses not to choose ignobly shuns responsibility and cannot honorably say i choosing central to initiative sparks the economy that feeds earth s swollen population choosing works on policy issues that dispassionate reason cannot handle and nothing less than good choosing will see us through these interesting times however the melding of reason with choosing gave our species its edge over all the other hominids context matching theory helps us voters ceos legislators choose well by telling us the nature of the act of choosing cm theory directly opposes da s rational models painting choosing as a swift natural happening basically intuitive and non mystical it exposes the prerequisites to good choosing theoretical impractical no way there is nothing so practical as a good theory kurt lewin and dr rhyne spends two thirds of this book exploring the many very practical often revolutionary implications of his good theory do you want to choose better learn how you choose

every day we make choices coke or pepsi save or spend stay or go whether mundane or life altering these choices define us and shape our lives sheena iyengar asks the difficult questions about how and why we choose is the desire for choice innate or bound by culture why do we sometimes choose against our best interests how much control do we really have over what we choose sheena iyengar s award winning research reveals that the answers are surprising and profound in our world of shifting political and cultural forces technological revolution and interconnected commerce our decisions have far reaching consequences use the art of choosing as your companion and guide for the many challenges ahead

please note this is a companion version not the original book sample book insights 1 we often ask these questions not because we re looking for survival tips but because we re fascinated by our limits and our ability to cope with the kinds of extreme conditions that there is little preparation for 2 the author explains that choice is an extremely powerful force that determines how we live we can measure our lives by the choices we make which brings us to where we are today 3 in 1957 curt richter conducted an experiment that showed how some rats were more persistent than others the rats were placed in a situation where they had to swim for their lives and even though the water temperature

was the same some rats continued swimming for an average of 60 hours before becoming exhausted 4 when we speak of choice what we mean is the ability to exercise control over ourselves and our environment to choose we must first perceive that control is possible the rats kept swimming despite mounting fatigue and no apparent means of escape because they had already tasted freedom which they had attained through their own vigorous wriggling efforts

judging ourselves and others by external standards can feel empowering as if we are sorting out the world and escaping whatever fails to measure up whether we are looking at people situations or activities but judgment can hold us hostage and leave us dissatisfied with life the art of choosing you tools to radically shift your life argues that judgment is a trap putting us on a hamster wheel as we repeatedly strive to meet inauthentic expectations rather than finding freedom and peace through a practice the author calls living in allowance of ourselves and others readers are introduced to the circle theory the empowerment of perspective how polarity creates limitations and allowance creates possibilities receiving the gift of nature the power of a question how and why to lower energetic walls how to connect to mind body soul and spirit the benefits of becoming undefinable how not to be trapped by positivity drawing deeply on the author's struggle to follow her own unique path through life this book offers tools that will empower readers to step beyond judgment and choose themselves readers have stated they are keeping the art of choosing you tools to radically shift your life as a reference book to remind them how to choose to live their lives

some rare though possible situations which the twentieth amendment authorizes congress to address also the book questions the constitutionality of the national popular vote plan to introduce a direct popular presidential election de facto without amending the constitution and addresses the plan's achilles heel in particular the book shows that the plan may violate the equal protection clause from the fourteenth amendment of the constitution numerical examples are provided to show that the counterintuitive claims of the npv originators and proponents that the plan will encourage presidential candidates to chase every vote in every state do not have any grounds finally the book proposes a plan for improving the election system by combining at the national level the one state one vote principle embedded in the constitution and the one person one vote principle under this plan no state loses its current electoral college benefits while all the states gain more attention of presidential candidates
