in recent years medicalization the process of making something medical has gained considerable ground and a position in everyday discourse in this multidisciplinary collection of original essays the authors expertly consider how issues around medicalization have developed ways in which it is changing and the potential shapes it will take in the future they develop a unique argument that medicalization biomedicalization pharmaceuticalization and geneticization are related and co evolving processes present throughout the globe this is an ideal addition to anthropology sociology and sts courses about medicine and health

you want you need alexandra levit as your guide daniel h pink new york times bestselling author of drive there s been a major paradigm shift in business practices and the workplace alexandra levit tells readers what no longer holds true for getting ahead today and debunks business myths that are more dangerous and less viable than ever given the current climate of ethical scrutiny and intense competition including it s best to climb the ladder as fast as possible and that employers

want you to be yourself levit offers something better in place of these myths practical advice on what it really takes to succeed in this new values driven environment

indicating ways to improve patient outcome was the main driver writing this book two years of research structuring collecting and writing around the central subject of our days digital similar to other spheres of our lives digital has the power to change many aspects of healthcare and improve patient s lives not only tells the book about the obvious but also points to many use cases and innovative examples of digital in health by definition digital interconnects and integrates people and things maybe some of the players in healthcare find the idea of working across sectors harmful to their own business model digital in health in any case means leaving traditional comfort zones besides telling about the digital past and present the book digital in health defines conveys ideas triggers concepts and indicates digital business models and cases already existing in contrast to what we encounter every day digital concepts in healthcare are lagging far behind the rest of the world has already advanced a lot further after technology is available the most important prerequisite for the development of digital in health evidently is the mindset of protagonists digital today is far more than a buzzword after every one of us is regularly confronted with it today many are already depending on digital reaching into every corner of our life none of our today s lives could continue to function as it is without leveraging and using all these digital tools and applications digital in health wants to help pave the way for digital ideas supporting the constant ambition to improve patient outcome joining forces for the common goal of better care the coauthors added most relevant and important views each from his own professional background many thanks to salil kallianpur gerd luippold christian milaster and anup soans who contributed so greatly to the book while living in india germany and the united states of america

the racial categories that the schools use are completely bonkers an arbitrary mess mostly left over from the work of federal bureaucrats in the 1970s that can t withstand the slightest scrutiny the administrators who rely on these categories are beholden to senseless and unscientific distinctions they aren t even competent or rational racialists justice samuel alito raised this issue in the arguments pretty clearly relying on the work of george mason university professor david bernstein who eviscerated the categories in an amicus brief and has written a book on their origin and implications classified the untold story of racial classification in america national review americans are understandably squeamish about official racial and ethnic classifications nevertheless they are ubiquitous in american life applying for a job mortgage university admission citizenship government contracts and much more involves checking a box stating whether one is black white asian hispanic or native american while reviewing the surprising history of american racial classifications classified raises questions about the classifications coherence logic and fairness for example should pakistani chinese and filipino americans be in the same category despite their obvious differences in culture appearance religion and more why does the government not allow americans to classify themselves as bi or multi racial how did the government decide

that a dark complexioned burka wearing muslim yemini should be classified as generically white but a blond haired blue eyed immigrant from spain should be classified as hispanic and treated as a member of a minority group why does the government require biomedical researchers to classify study participants by the official racial categories when the classifications have no scientific basis in an increasingly diverse society with high rates of intergroup marriage the american system of racial classification is getting even more arbitrary and absurd with rising ethno nationalism threatening democracy around the world it s also dangerous classified argues that the time has come to consider abolishing official racial classification and replace it with the separation of race and state

in the summer of 2017 the newly arrived president of marine corps university brigadier general william j bowers ordered a lecture series the legacy of belleau wood 100 years of making marines and winning battles the series would include four lectures and it was to be supported by an anthology produced by history division providing readings to the students on the topics each lecture would cover the intent was to produce an anthology of lasting worth to marines broadly depicting keystone moments in the history of the corps during the century following the battle of belleau wood this volume presents a collection of 36 extracts articles letters orders interviews and biographies the work is intended to serve as a general overview and provisional reference to inform both marines and the general public of the broad outlines of notable trends and controversies in marine corps history provided by publisher
