the year 2008 marks the beginning of the baby boomer retirement avalanche just as the different demographics in advanced and most developing countries are becoming more pronounced people are worrying again that developments in global population trends food supply natural resource availability and climate change raise the question as to whether malthus was right after all the age of aging explores a unique phenomenon for mankind and therefore one that takes us into uncharted territory low birth rates and rising life expectancy are leading to rapid aging and a stagnation or fall in the number of people of working age in western societies japan is in pole position but will be joined soon by other western countries and some emerging markets including china the book examines the economic effects of aging the main proposals for addressing the implications and how aging societies will affect family and social structures and the type of environment in which the baby boomers children will grow up the contrast between the expected old age bulge in western nations and the youth bulge in developing countries has important implications for globalization and for immigration in western countries two topics already characterized by rising discontent or opposition but we have to find ways of making both globalization and immigration work for all for fear that failure may lead us down much darker paths aging also brings new challenges for the world to address in two sensitive areas the politicization of religion and the management of international security governments and global institutions will have to take greater responsibilities to ensure that public policy responses are appropriate and measured the challenges arising within aging societies and the demographic contrasts between western and developing countries make for a fractious world one that is line with the much debated decline of the west the book doesn t flinch from recognizing the ways in which this could become more visible but also asserts that we can address demographic change effectively if governments and strengthened international institutions are permitted a larger role in managing change

the international handbook of population aging examines research on a wide array of the profound implications of population aging it demonstrates how the world is changing through population aging and how demography is changing in response to it

it is not news that each of us grows old what is relatively new however is that the average age of the american population is increasing more and better information is required to assess plan for and meet the needs of a graying population the aging population in the twenty first century examines social economic and demographic changes among the aged as well as many health related topics health promotion and disease prevention quality of life health care system financing and use and the quality of careâ especially long term care recommendations for increasing and improving the data availableâ as well as for ensuring timely access to themâ are also included

the increases in global wealth and the developments in the field of health have led to decreases in mortality rates increases in life expectancy and decreases in fertility rate leading to a population that is

rapidly consisting more and more of older individuals the demographic changes affect nearly all parts of society including economics education health social security systems socio cultural activities and more thus it is essential to study the impacts that an aging population will have on society the handbook of research on economic and social impacts of population aging analyzes the economic and social impacts of population aging from a multidisciplinary perspective covering topics such as life expectancy social welfare health social security and more this book is essential for social scientists sociologists demographers economists medical professionals government officials policymakers professionals researchers managers students and academicians looking to understand the effects of an aging population on modern society

the united states is in the midst of a major demographic shift in the coming decades people aged 65 and over will make up an increasingly large percentage of the population the ratio of people aged 65 to people aged 20 64 will rise by 80 this shift is happening for two reasons people are living longer and many couples are choosing to have fewer children and to have those children somewhat later in life the resulting demographic shift will present the nation with economic challenges both to absorb the costs and to leverage the benefits of an aging population aging and the macroeconomy long term implications of an older population presents the fundamental factors driving the aging of the u s population as well as its societal implications and likely long term macroeconomic effects in a global context the report finds that while population aging does not pose an insurmountable challenge to the nation it is imperative that sensible policies are implemented soon to allow companies and households to respond it offers four practical approaches for preparing resources to support the future consumption of households and for adapting to the new economic landscape

people are living longer not only in wealthy countries but in developing nations for too long western experts have conceived of aging as a universal predicament one that supposedly provokes the same welfare concerns in every context it is time kavita sivaramakrishnan writes to embrace a new approach that prioritizes local agendas and values

population ageing is projected to affect all countries across the world in coming decades the current rate of population ageing is unprecedented in human history with population projections indicating that this will be an enduring trend moreover population ageing is spatially pervasive affecting every man woman and child this has considerable implications for policy responding to the economic social and healthcare outcomes of population ageing the potential economic implications have been likened to those of the 2008 global financial crisis this book examines the patterns and causes of uneven population ageing it identifies those countries and localities most likely to experience population ageing and the reasons for this attention is also given to the role that youth migration labour force migration retirement migration and ageing in place have in influencing the spatial concentrations of older people the book brings together a range of diverse international case studies to illustrate the importance of understanding the causes of population ageing case studies include a review of ageing in florida s usa labour force an investigation into the housing arrangements for the elderly in northern ireland and an assessment of the environmental stewardship activities of grey nomads on western australia s remote north coast

the international handbook of population aging examines research on a wide array of the profound implications of population aging it demonstrates how the world is changing through population aging and how demography is changing in response to it

while much of the current literature on the economic consequences of an aging population focuses on the negative aspects this enlightening book argues that seniors can bring significant benefits such as vitality and competitiveness to an urban economy the authors illustrate the ways an aging population can have a positive impact on urban centers including the move by large numbers of seniors from the suburbs to the city where their disproportionate consumption of education and the arts helps rejuvenate city centers given this the authors conclude that a large and active senior population has the potential to assist a city in the achievement of its strategic economic objectives the book includes analyses of the effects of population aging on best practices in 40 cities in the us and eu with surprising results as well as interviews with city officials and leaders academics researchers and public officials in the areas of urban development public policy and aging will find much in this original approach to interest and provoke

debate

the committee on national statistics and the committee on population at the request of the nia convened a workshop in march 1996 to discuss data on the aging population that address the emerging and important social economic and health conditions of the older population the purposes of the workshop were to identify how the population at older ages in the next few decades will differ from the older population today to understand the underlying causes of those changes to anticipate future problems and policy issues and to suggest future needs for data for research in these areas the scope of the workshop was broader than that of the 1988 cnstat report including not only data on health and long term care but also actuarial economic demographic housing and epidemiological data needs for informing public policy

this book examines claims that aging populations will create serious economic problems for various nations it examines the question in large part through the eyes of researchers and legislators in three target countries australia japan and the united states these countries were chosen because of similar states of economic development and because all were experiencing a rapid aging of their populations a comprehensive overview is provided of the economic issues related to aging populations several aspects are explored in more depth to date it is the most complete and thorough study of economic issues associated with population aging after a brief review of the phenomenon of demographic aging the authors give a summary of the major economic programs offered to the aged extensive research is used to evaluate the concept of dependency ratios and to predict the impact on younger and older persons of future economic and demographic growth this discussion then provides the basis for a review of evolving retirement policies in the three countries special attention is given to the way pension plans have been designed especially early and mandatory retirement policies an assessment of the adequacy of retirement income follows the final three chapters are devoted to policy options for the future given trends in demographic aging social scientists and economists will be most interested in this study

by 2030 when most american baby boomers will have retired all the large industrial economies will see a massive increase in the old age population this book examines population aging and its implications for

The Age Of Aging How Demographics Are Changing The Global Economy And Our World Ebook George Magnus

public retirement programs in the five largest industrial economies britain france germany japan and the united states the authors report on national demographic trends examine the current living conditions of the aged population explain the structure of the retirement system and offer estimates of future budgetary costs of the public programs they also discuss national debates over the potential reform of public retirement systems while all five countries share the prospect of an older population variations in the size and timing of demographic change as well as important differences in the structure of public programs for the elderly suggest that population aging will have widely different implications in each country in germany and japan for example the population will not only grow older but may actually decline because of low birth rates the united states will experience less aging but its debate over reform treats seriously the possibility of privatizing public retirement commitments
