uses new research about the brain to explore how we can transcend our
current physical and cultural limitations reveals that transcendence of
current modes of existence requires the dynamic interaction of our fourth
and fifth brains intellect and intelligence explores the idea that Jesus Lao Tzu
and other great beings in history are models of nature's possibility and our
ability to achieve transcendence 17 000 sold in hardcover since April 2002
why do we seem stuck in a culture of violence and injustice how is it that we
can recognize the transcendent ideal represented by figures such as Jesus Lao
Tzu and many others who have walked among us and yet not seem to reach

the same state in the biology of transcendence joseph chilton pearce examines the current biological understanding of our neural organization to address how we can go beyond the limitations and constraints of our current capacities of body and mind how we can transcend recent research in the neurosciences and neurocardiology identifies the four neural centers of our brain and indicates that a fifth such center is located in the heart this research reveals that the evolutionary structure of our brain and its dynamic interactions with our heart are designed by nature to reach beyond our current evolutionary capacities we are quite literally made to transcend pearce explores how this biological imperative drives our life into ever greater realms of being even as the cultural imperative of social conformity and behavior counters this genetic heritage blocks our transcendent capacities and breeds violence in all its forms the conflict between religion and spirit is an important part of this struggle but each of us may overthrow these cultural imperatives to reach unconflicted behavior wherein heart and mind brain resonate in synchronicity opening us to levels of possibility beyond the ordinary

the oxford handbook of environmental history draws on a wealth of new scholarship to offer diverse perspectives on the state of the field

understanding how simple molecules have given rise to the complex biochemical systems and processes of contemporary biology is widely regarded as one of chemistry's great unsolved questions there are numerous theories as to the origins of life the majority of which draw on the idea that dna and nucleic acids are the central dogma of biology the singularity of nature a convergence of biology chemistry and physics takes a systems based approach to the origin and evolution of complex life readers will gain a novel understanding of physiologic evolution and the limits to our current understanding why biology remains descriptive and non predictive as well as offering new opportunities for understanding relationships between physics and biology in the origins of biological life at the cellular molecular level
