a pharmacologist and a veterinarian pull back the curtain on the human and animal health effects of hydraulic fracturing or fracking across the country fracking the extraction of natural gas by hydraulic fracturing is being touted as the nation s answer to energy independence and a fix for a flagging economy drilling companies assure us that the process is safe politicians push through drilling legislation without a serious public health debate and those who speak out are marginalized their silence purchased by gas companies and their warnings about the dangers of fracking stifled the real cost of fracking pulls back the curtain on how this toxic process endangers the environment and harms people pets and livestock michelle bumperger a veterinarian and robert oswald a pharmacologist combine their expertise to show how contamination at drilling sites translates into ill health and heartbreak for families and their animals by giving voice to the people at ground zero of the fracking debate the authors vividly illustrate the consequences of fracking and issue an urgent warning to all of us fracking poses a dire threat to the air we breathe the water we drink and even our food supply bumperger and oswald reveal the harrowing experiences of small farmers who have lost their animals their livelihoods and their peace of mind and of rural families whose property values have plummeted as their towns have been invaded by drillers at the same time these stories give us hope as people band together to help one another and courageously fight to reclaim their communities the debate over fracking speaks to a core dilemma of contemporary life we require energy to live with modern conveniences but what degree of environmental degradation health risks and threats to our food supply are we willing to accept to obtain that energy as these stories demonstrate the stakes couldn t be higher and this is an issue that none of us can afford to ignore

master s thesis from the year 2012 in the subject politics international politics topic european union grade a brunel university course public affairs lobbying language english abstract the european oil gas industry is concerned about the growing uproar and opposition against shale gas despite shale gas s importance and viability in north america the potential for the development and recovery of shale gas in europe is limited due to stricter regulation legislation and higher population density there is going to be significant legal and regulatory developments relating to unconventional gas all expected in the coming years including a possible challenge being raised against hydraulic fracturing this case study sets out to investigate the strategic considerations and lobbying activities undertaken by the shale gas industry and to examine opportunities and challenges for the shale gas industry to influence eu policy decisions previous attempts to lobby national and eu institutions have been rather sporadic but there is great potential and willingness to streamline and channel expertise and information which are critical resources for acquiring access to the eu policy process this paper looks at the theoretical framework of strategies of eu interest representation more specifically at the way corporate and organisational factors influence the political strategies of shale gas interest groups and how firms lobbying strategies need to be adapted to the complexity of the eu policy process resulting from this analysis it is argued that the shale gas industry needs to form ad hoc coalitions which would allow to operate with the flexibility required in the dynamic multi level and technical eu energy sector
