offering a global account of the long world war ii this book challenges conventional narratives that picture a clearly defined war period 1939 1945 followed by a distinct postwar era dominated by the encroaching cold war arguing instead that while some aspects of the war did end abruptly in 1945 in many corners of the world war bled directly and raggedly into the postwar such as allied occupation in italy the civil war in greece the rise of us hegemony and struggles for national liberation in india from world war to cold war shows how critical developments in the latter half of the 20th century were a direct result of the second world war and reconceptualizes the conflict as an intersecting series of regional wars as well as an overarching world war offering new ways to think

about how the war shaped the second half of the 20th century this book reaches into those regions often overlooked in the study of wwii showing how wartime relations between the us and latin america played a crucial role in the worldwide development of us hegemony how wwii accelerated the retreat from empire in sub saharan africa and how it encouraged the growth of anti colonialism in regions around the world buchanan offers a truly global account of the outcomes of the largest conflict in human history and challenges the temporal boundaries in which we view it

the years 1942 to 1946 saw the acceleration of world war ii its conclusion and the construction of a post war order that was to culminate in the cold war andrew baker here examines the expansion of us political and economic power and hegemony during this period and the extent to which smaller states particularly australia new zealand canada and south africa contested this expansion through successfully outlining and defending their own notions of sovereignty property and commercial rights they were able to make a significant contribution towards fashioning a post war framework more conducive to states than empires this analysis of the period immediately after world war ii will appeal to researchers of history and international relations as well as those interested in the political economy of the post war world

theme of 1st ser full employment and minimum living standards of 2d postwar goals and economic reconstruction of 3d postwar economic society of 4th america s place in the world economy

grunden s analysis of this fundamental flaw in the japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of world war ii comparing the science and weapons programs of all the major combatants he demonstrates that japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries in the end japan could not overcome these obstacles and thus failed to make the transition to the kind of big science it needed to ward off its enemies and dominate the far east book jacket
