over the past few centuries as western civilization has enjoyed an expansive and flexible geographic domain westerners have observed other cultures with little interest in a return gaze in turn these other civilizations have been similarly disinclined when they have held sway clearly though an external frame of reference outstrips introspection we cannot see ourselves as others see us unprecedented in its scope what the rest think of the west provides a rich historical look through the eyes of outsiders as they survey and scrutinize the politics science technology religion family practices and gender roles of civilizations not their own the book emphasizes the broader figurative meaning of looking west in the scope of history focusing on four civilizations islamic japanese chinese and south asian nader has collected observations made over centuries by scholars diplomats missionaries travelers merchants and students reflecting upon their own wests these writings derive from a range of purposes and perspectives such as the seventh century chinese buddhist who goes west to india the missionary from baghdad who travels up the volga in the tenth century and meets the vikings and the egyptian imam who in 1826 is sent to paris to study the french the accounts variously express critique adoration admiration and fear and are sometimes humorous occasionally disturbing at times controversial and always enlightening with informative introductions to each of the selections laura nader initiates conversations about the power of representational practices

a plan for restoring and protecting freedom based on the united states constitution there has been a deliberate effort over the past one hundred years to change the worldview of americans from a liberty and constitutionally focused world view based on the writings of englishman john locke to that of government control of the individual based on the writings of frenchman jean jacques rousseau rousseau s model of state control now dominates government policy and america s world view and the free market civil liberties and protections guaranteed by the united states constitution are being destroyed the rousseau world view dominates our education judicial media and legislative institutions with what is called progressivism this leads to socialism fascism and even communism it is what has inflamed the backlash known as the tea party movement there is hope however although seriously weakened the constitution still stands and its protections are still in most laws at the federal and state level that offers protections for local communities that are generally unknown to most people even attorneys the book explains why americans are so divided how the destruction of liberty occurred who is behind it and how americans can stop this destruction of our way of life by electing constitutionally based candidates to office and protect their communities from egregious federal and state laws and regulations

if our near future sometimes feels like a dystopian sci fi movie that s because it is in come with me if you want to live the future as foretold in classic sci fi films michael harris reveals the hidden in plain sight meanings of the greatest science fiction films of the past fifty years the ways in which they predicted the future that we are increasingly living in but how we can still avoid the worst of what they warned us about the 1970s saw the start of a new wave of science fiction that predicted environmental destruction out of control technology and escalating political crises these were not the fantastical imaginings of filmmakers they were based on rising environmental consciousness and solid scientific research the explanation of why we didn t heed these warnings might be the most important story of our time and now our future each chapter focuses on a classic sci fi film among them blade runner terminator 2 12 monkeys brazil soylent green and the back to the future series these films are used to consider our likely environmental technological and political future but taking sci fi seriously again could help us to regain our power to create different tomorrows guided by practical utopianism and to imagine new science fictions for a better world if you re wondering what the future holds maybe you ve already seen it

america is falling and may not be here without change as we know it in our life time just as the u s s r suddenly fell in the 1990 s ruining that super power and ending the cold war with hundreds of thousands of refugees having to flee russia with reports of human meat being sold as the currency rubble became worthless as the u s s r broke up into 15 independent states unexpectedly shocking the world indicative of the fact that it will happen to america as banks made sub prime loans to rape the housing industry and consumers with credit

cards and the manufacturing base being traded bit by bit liquidating assets for cash selling out the u s preparing for the collapse of the u s dollar and the fall of the u s with the u s borrowing billions to fund tax cuts for the rich are we truly living in the last days of america as a super power all states without exception have come to an end as a historical norm america is not mentioned in any jewish christian or islamic scriptures thus it will not be here as we know it in the end but this is not a religious writing oil is only the first commodity to be affected with housing money food loans and soon jobs following like china and the eu we need to stop the hoarding of so much money in the hands of so few the gold standard is not the bases for our money since 1975 meaning that paper and plastic have no intrinsic worth if history repeats itself and it does we may have multiple civil wars with hawaii declaring independence in april as a protest over how the economy has been managed with each state having its own national guard and gangs and militia s and kkk armed to the teeth we will start to hear phrases like who will pay for this and that debt with maybe as many as ten different presidents as the u s brakes up rumors of war we the people must demand a marshal plan for america and not europe japan s korea etc and now maybe iraq all of us in america need to have access to the money we need at low or no cost to save america and optimize the multiplier effect but it has to be spent in the u s to make america strong thus we need to stop the banks and utility companies etc from hoarding it is insanity to have multibillionaires as they cannot spend these sums we can re order the economy or others will do it for us this book will attempt to answer the question on how to stop such a fall into a dark age and instead have cooperation and justice between all men and countries stopping this horrible cycle of systematic retardation of mankind america is the last best hope for mankind as america has polluted and consumed too much of this planet s resources becoming the super power it is to have a new emerging super power doing the same

the united states is undergoing a profound and radical transformation all features of which point to the fact of its departure at an accelerated rate from its largely self proclaimed status as a global hegemon the united states has lost ground in every single category that defines the power and status of a nation in relation to its rivals this book delves into the reasons for a catastrophic decline of the american nation addressing a range of factors from the economic especially energy to cultural technological and military factors america s deindustrialized economy is now deeply affected by what can only be described as a massacre of her small and middle size businesses and the implosion of the us commercial aerospace industry america s only driver of real growth the shale oil industry is facing realities which may make the great depression pale in comparison disintegration also seeks answers to the precipitous moral and professional decline of the always mediocre qualities of the american elites from the corridors of political power to those of the military and business now spiraling out of control more alarmingly the trend also points to the

possibility of the actual physical disintegration of the united states as a unified entity whether the divisions are ethnic or ideological the most profound fault line is cultural between the coastal self proclaimed elites backed by the secular liberal media and deep state who promote the most radical ideologies as it concerns gender and race and the working class majority whom the former polemicize as deplorables christian fundamentalists white supremacists and climate and science denialists investigating these factors sheds light on america s future which holds very little promise for the country which had once proclaimed itself to be a shining city on the hill the american collapse is not just coming we are presently experiencing it how can we deal with a catastrophe which is unfolding before our very eyes disintegration lays out some possibilities

my interest in ancient maya agriculture began late in the year of 1971 when william m denevan encouraged me to pursue the topic our interests had been perked by reports from joseph w ball jack eaton and irwin rowner of the presence of terrace like features throughout the rio bee region of the southern yucatan peninsula denevan maintained a long term interest in pre hispanic agriculture and population in the new world our studies with the emerging rio bee research group at the university of wisconsin led to the conclusion that the then dominant themes of maya agriculture were in need of reevaluation and that a number of remains of intensive forms of agriculture were likely to be found in the central maya lowlands of mexico peten guatemala and belize particularly wetland or raised fields in addition to the reported terraces our interests were heightened at this time by notification from alfred siemens of the finds of wetland fields in the vicinity of the rio bee region in the chetumal mexico northern belize area
