investigating the impact of arabic medieval astrological and magical theories on early modern occult philosophy this book argues that they provided a naturalistic explanation of astral influences and magical efficacy based on aristotelian notions of causality

spectacles designed to capture our attention surround us marketing movies shopping malls concerts and virtual realities capture our imaginations and cultivate our desires we live in a society of the spectacle however is the power and prevalence of spectacle unique to the modern era in the pages of gifts glittering and poisoned early christian voices echo across the centuries to show that the society of the spectacle is not new our era resembles a time when the spectacular entertainments of ancient rome had a

profound effect on every aspect of social life by drawing on the rich theology and witness of early christianity gifts glittering and poisoned asks what it means for us to live in a new era of empire and spectacle through augustine s description of the demonic it shows how consumerism constructs a sophisticated symbolic order a society of the spectacle that corrupts our deepest longings for god

in contradistinction to the many monographs and edited volumes devoted to historical cultural or theological treatments of demonology this collection features newly written papers by philosophers and other scholars engaged specifically in philosophical argument debate and dialogue involving ideas and topics in demonology the contributors to the volume approach the subject from the perspective of the broadest areas of western philosophy namely metaphysics epistemology logic and moral philosophy the collection also features a plurality of religious cultural and theological views on the nature of demons from both eastern and western thought in addition to views that may diverge from these traditional roots philosophical approaches to demonology will be of interest to philosophers of religion theologians and scholars working in philosophical theology and demonology as well as historians cultural anthropologists and sociologists interested more broadly in the concept of demons

an important new book on how we can still believe in a god of love and confront the problem of evil in the world probably the most important book on the subject since john hick s book evil and the god of love evil is a strong word that people now employ fairly rarely many people believe these days that god is omnipotent omniscient and good and that what we deem to be bad or evil in the world is no reason for abandoning belief in god it is an intellectual or theoretical problem not one where the focus is on how one might bring about some desirable goal a practical matter professor davies says we should tackle this problem by attending to the basics by asking whether there is a god and then what is god he starts by summarizing the arguments so far from seneca to the present day he then moves to what he describes as the basics see above and demonstrates that much of what has been written about on the topic of evil is in fact irrelevant or just plain wrong finally though many theologians argue that evil is a mystery davies argues that this too is wrong and a cop out we should rather be concerned with the problem or mystery of good the real issue is why is there not more good than there is from the discussion aquinas emerges as a hero as filtered through analytical philosophy but many moderns thinkers do not emerge so well davies effectively picks holes into the arguments of peter geach paul helm richard swinburne and even mary baker eddy this is a lively book on a tricky subject written at all times with humour and much practical example

v 1 the class of books to which the philosophy of the unconscious belongs is all but unrepresented in our literature but the absence of similar home productions can no longer be held to imply either an inability to comprehend their scope or an indifference to their results to what shall we attribute the welcome accorded of late to certain

reproductions and elucidations of the master works of modern transcendentalism if not to the awakening of a long repressed desire to re examine the foundations of a spiritual fabric for whose stability an instinctive confidence alone made answer to many two attitudes of mind have become insupportable that of total unconcern about fundamental truth and that of unthinking acquiescence in the admission of merely juxtaposed and uncommunicating spheres of positive knowledge and impenetrable nescience psycinfo database record c 2011 apa all rights reserved

in the sonic episteme robin james examines how twenty first century conceptions of sound as acoustic resonance shape notions of the social world personhood and materiality in ways that support white supremacist capitalist patriarchy drawing on fields ranging from philosophy and sound studies to black feminist studies and musicology james shows how what she calls the sonic episteme a set of sound based rules that qualitatively structure social practices in much the same way that neoliberalism uses statistics employs a politics of exception to maintain hegemonic neoliberal and biopolitical projects where james sees the normcore averageness of taylor swift and spandau ballet as contributing to the sonic episteme s marginalization of nonnormative conceptions of gender race and personhood the black feminist political ontologies she identifies in beyoncé s and rihanna s music challenge such marginalization in using sound to theorize political ontology subjectivity and power james argues for the further articulation of sonic practices that avoid contributing to the systemic relations of domination that biopolitical neoliberalism creates and polices
