as more people worldwide live in cities increasingly we need to understand how cities and city living affect population health does city living negatively affect health conversely can city living enhance population health and well being over forty experts from around the world bring a depth of ideas to the handbook of urban health making the handbook a focused resource for a range of health disciplines the handbook presents 1 a discussion of the health of specific urban populations among them immigrants children the elderly racial and sexual minorities the homeless and the poor 2 methods relevant to the study of urban health including epidemiology research methods funding and policy issues urban planning 3 practical issues for developing healthy cities including interventions preventive strategies providing health services and teaching urban health 4 international perspectives from developing countries and the world health organization 5 integrative chapters that

conclude each of the book's sections bringing together theoretical models with the big picture a unique professional idea book research resource and teaching text the handbook of urban health challenges readers to consider the role that cities play in shaping population health and to generate solutions that can make cities healthier places for all those who live there

this book's central focus is to provide academics students policy makers and practitioners with a unique insight into a wide variety of perspectives on settings based health promotion it offers clarity amidst different interpretations and ideological understandings of what applying a settings based approach means emphasis is given to a salutogenic focus exploring how the creation of wellbeing and fostering of potential in settings to best enable individuals and populations to flourish implies that the setting itself must be the entry point for health promotion building on this the text explores how the settings approach to health promotion strives for changes in the structure and ethos of the setting detailing how changes and developments in people's health and health behavior are easier to achieve if health promoters focus on settings rather than solely on individuals the book comprises 15 chapters organized in three sections in part i evolution foundations and key principles of the settings based approach the first four chapters present the determinants theoretical basis and generic commonalities that are consistent over various settings initiatives and formulate the grounds for the settings based health promotion approach in part ii applying the settings based approach to key settings chapters 5-13 introduce the key settings initiatives both traditional and non traditional new and contemporary with their developments and specific features in part iii gaia the ultimate setting for health promotion the last two chapters consider the settings approach in the context of future challenges and explore possible directions for further development handbook of settings based health promotion has novel information and perspectives on the topic that provide readers with up to date specialist knowledge and application of global developments to develop and enhance a common understanding and generate new thinking in relation to contemporary settings this timely tome will engage the academic community in the fields of health promotion and public health including students teaching staff and researchers additionally it is a useful resource for policy makers and practitioners in these fields

this important book makes a significant contribution to the emergent body of public health knowledge by examining debates around the social context of health including key socio economic environmental and cultural factors

from sure start to healthy workplaces health action zones to community regeneration this volume makes the leap from research to action professor richard parish chief executive the royal society for the promotion of health what is public health and how has it changed over time what is the social context of public health and what are the dominant 21st century issues what strategies are in place to address population health this important book makes a significant contribution to the emergent body of public health knowledge by examining debates around the social context of health including key socio economic environmental and cultural factors in doing so the text locates within a social context the theoretical debates and problems surrounding public health and analyzes the practical public health strategies and solutions that have been developed to address them the book moves beyond traditional theoretical discourse to include coverage of the thinking frameworks and processes that are actively shaping public health in the 21st century provides tangible examples of public health strategies that have recently been introduced to tackle the social determinants of health the use of media strategies to promote health public health is key reading for students undertaking courses in health studies health promotion nursing public health social policy social work and sociology in addition to a wide student readership the book s focus on public health action and current practice also makes it highly relevant to professionals the text brings together a distinguished group of practitioners social scientists and public health experts who contribute their ideas and research contributors amanda amos mel bartley linda bauld hannah bradby tarani chandola jeff collin paul fleming colin fudge sebastian garman ben gidley jenny head david hunter martin king roderick lawrence kelley lee yaojun li mhairi mackenzie alex marsh antony morgan jennie popay graham scamblor sasha scamblor angela scriven nick watson

the principle of contraction and convergence can be applied to climate change showing us a way forward by reducing the ecological footprint of some while increasing that of others such convergence has many dimensions technological change cultural diversity human rights and political power this briefing explores these ideas and describes how a charity put these ideas into action inspired by the work of social change and development scad in india the charity has directly reduced carbon emissions by erecting wind turbines in india funded by individuals and businesses with high emissions elsewhere in the world in return for an allocation of the carbon saved the converging world is an action story which tackles the complexities of climate change environmental degradation and social injustice

in recent years ecovillages local communities which aim to minimise their ecological

impact but maximise human wellbeing and happiness have proliferated worldwide this briefing describes the history and potential of the ecovillage movement book jacket

robin stott proposes solutions to the key problems that beset our present health system he argues that if we are to develop a true public health service rather than a disease service we must make radical changes to the decision making processes we need to acknowledge the health impact of many factors including the distribution of wealth the size of communities lifestyle issues local pollution and the condition of the whole planet the briefing shows how enhanced interaction between people can promote health social justice and environmental improvements and sets out a blueprint for local health improvement organisations

complementary and alternative medicine can have a central part to play in the future of health care in the maintaining and creating health

gaian democracies shows how to create a global network of just and sustainable societies that could co exist symbiotically with gaia the authors stress the systems framework on which they have based their proposals and draw on real world examples such as the mondragon cooperatives of basque spain visa international the semco corporation and the hundreds of participative budgets initiated by brazilian workers party

how do we equip learners with the values knowledge skills and motivation to help achieve economic social and ecological well being how can universities make a major contribution towards a more sustainable future amid rising expectations on them from professional associations funders policy makers and undergraduates and increasing interest amongst academics and senior management a growing number of higher education institutions are taking the lead in embracing sustainability this response does not only include greening the campus but also transforming curricula and teaching and learning this book explains why this is necessary and crucially how to do it bringing together the experience of the hefce funded centre for sustainable futures csf at the university of plymouth and the higher education academy s education for sustainable development project the book distills out the curriculum contributions of a wide range of disciplinary areas to sustainability the first part of the book provides background on the current status of sustainability within higher education including chapters discussing interdisciplinarity international perspectives and pedagogy the second part features 13 chapter case studies from teachers and

lecturers in diverse disciplines describing what has worked how and why and what hasn't whilst the book is organised by traditional disciplines the authors and editors emphasise transferable lessons and interdisciplinarity so that readers can learn from examples outside their own area to embed sustainability within their own curricula and teaching subject areas covered include geography environmental and earth sciences nursing health law dance drama music engineering media and cultural studies art and design theology social work economics languages education business and built environment

meat and dairy production and consumption are in crisis globally 60 billion farm animals are used for food production every year it is well accepted that methane emissions from cattle and other livestock are major contributors to greenhouse gas levels and to climate change the food and agriculture organization of the united nations fao predicts a rough doubling of meat and milk consumption by 2050 with particularly rapid growth occurring in the developing economies of asia this could raise the number of farm animals used annually to nearer 120 billion what will this mean for the health and wellbeing of those animals of the people who consume ever larger quantities of animal products and for the health of the planet itself this powerful and challenging book explores these issues surrounding the global growth in the production and consumption of meat and dairy animals and products including cultural and health factors and the implications of the likely intensification of farming for both small scale producers and for the animals several chapters explore the related environmental issues from resource use of water cereals and soya to the impact of livestock production on global warming and issues concerning biodiversity land use and the impacts of different farming systems on the environment a final group of chapters addresses ethical and policy implications for the future of food and livestock production and consumption the overall message is clearly that we must eat less meat to help secure a more sustainable and equitable world

developers local authorities and government all now say we need to create sustainable communities and government legislation is starting to incentivise developers in this direction

this text explains why money has different effects according to its origins and purposes it shows that to build a just and sustainable world money creation must be democratized and the payment of interest on money in circulation scrapped

the c c framework which was been pioneered and advocated by gci at the united

nations throughout the 1990s is the most widely supported framework proposal in the global debate on what to do about climate change
