a single organizing focus giving philosophical force to his arguments in his central science of logic
and undercutting prominent worries the focus is not epistemology or skepticism but the

setting forth an innovative new model for what it means to be a writing teacher in the era of writing
across the curriculum the end of composition studies urges a reconceptualization of graduate
work in rhetoric and composition systematically critiques the limitations of current pedagogical
practices at the postsecondary level and proposes a reorganization of all academic units david w
smit calls into question two major assumptions of the field that writing is a universal ability and

that college level writing is foundational to advanced learning instead smit holds writing involves a wide range of knowledge and skill that cannot be learned solely in writing classes but must be acquired by immersion in various discourse communities in and out of academic settings the end of composition studies provides a compelling rhetoric and rationale for eliminating the field and reenvisioning the profession as truly interdisciplinary a change that is necessary in order to fulfill the needs and demands of students instructors administrators and our democratic society

paul addressed the book of romans to both jews and gentiles even though rome was primarily a gentile city therefore it is reasonable to conclude that most believers in the churches at rome were gentiles the reason that this was important is that the judaizers continued to infiltrate the local churches and paul was determined to stop their false message of adding law keeping to grace from taking root and to demonstrate that the gospel is for all jews and gentiles

the holy trinity is the oldest idea of christian hope the study of being or ontology was once regarded as a seminal preparation for the study of god as the creative cause of all being in theology yet due to a series of theological mistakes metaphysics came to be separated from the trinity before god came to be conceived as the supreme being of all beings in general metaphysics natural theology and modern ontology the analytic and continental philosophical traditions have since tended to treat the trinity as at best superfluous and at worst redundant to modern formal ontologies yet the postmodern collapse of all such formal ontologies has prepared the path for a renewed study of metaphysics or ontology that shares in participation with the trinity new trinitarian ontologies names a creative response to this pivotal collapse of modern formal ontologies if ontology cannot contain but rather more radically points to god and if all nature thus tends towards the supernatural the angelic and the metaphysical then we should renew the study of the metaphysics or ontology of the trinity this volume represents a collection of responses to this challenge of rendering ontology in a trinitarian style
