the author reconciles the scientific and spiritual worlds by looking at empirical evidence for the existence of paranormal phenomena that points toward our spiritual nature including telepathy clairvoyance precognition psychokinesis and psychic healing

ideal for scientifically minded individuals curious about life s spiritual side as well as spiritually inclined people seeking to back up their beliefs this book offers evidence for the existence of telepathy precognition and psychic healing

our minds perceptions and beliefs have become so strongly rooted in material concepts and the science of measurement that materialism has become king in the modern world we generally do not realize the almost hypnotic power it has on our mindset and culture the material world has become so entrenched in our conceptualizations that despite claims of spiritual awakening

whatever that means our spiritual dimension cannot seep through this fall into materialism has cut us off from our innate spiritual perceptions in a materialistic and exclusively rationalistic minded age strong is the belief that modern science has given us superior knowledge over accounts of the spiritual worlds preventing deeper insights into the human being and the cosmos science remains deeply submerged in a materialistic worldview in which all aspects of qualitative experience the emergence of sentience life emotion meaning consciousness and awareness have been denied or repressed what is consciousness what is life and evolution is the universe only a purposeless gigantic clockwork is a post material science and worldview that goes beyond materialism's straitjacket possible these and many other questions are tackled in a series of essays that do not necessarily offer a predefined answer but rather suggest an alternative way of looking at and seeing the world nature and ourselves with a trans rational and intuitive approach going beyond the fragmented world of the age of enlightenment not only is possible but will be the inevitable outcome of our cultural evolution

essay from the year 2016 in the subject english language and literature studies literature grade 2 3 course literature and science language english abstract this essay deals with mary shelley's frankenstein written in 1818 in this time a highly controversial discussion started about living entities containing a kind of vital spirit or not and how it is related to electricity and chemistry the two main positions are on the one hand the vitalists and on the other the materialists vitalism consists of the supposition that every living source owns a vital force which brings life into them it is supposed that a soul was infused into the body by a power like god via electricity and the fact that they contain this sort of energy makes them different from non living entities

motivated by plantinga's work fourteen prominent philosophers have written new essays investigating plantingian warrant and its contribution to contemporary epistemology the resulting collection representing a broad array of views not only gives readers a critical perspective on plantinga's landmark work but also provides in one volume a clear statement of the variety of approaches to the nature of warrant within contemporary epistemology and to the connections between epistemology and metaphysics

marx through post structuralism presents a thorough critical examination of the readings of marx given by four post structuralist thinkers all key figures in continental philosophy jean françois lyotard jacques derrida michel foucault and gilles deleuze arguing that both marx and the post structuralists seek to produce a genuinely materialist philosophy the author aims to develop a better understanding of both marx and post structuralism and in so doing to reflect on the possibilities and problems for materialist philosophy more broadly against the common assumption that post structuralism begins with a rejection of marx choat argues that marx has been a key influence on post structuralist thought and that each of the four thinkers examined affirms marx's contemporary significance by looking at how these thinkers have read marx analysing their direct comments unspoken uses and implicit criticisms the book demonstrates that there is a distinct and original post structuralist approach to marx that allows us to read him in a new light

secular science demands we accept the philosophical dogma of scientific materialism that only material entities exist yet recent science has discovered the immaterial also mandated is the assumption that all things must be explained by natural causes but we now are certain that the universe had a beginning there was a time when nature didn't exist and yet we must attribute the origin of the universe to nature and what about darwin's theory of evolution taken as fact that every plant and animal owe its origin to a common ancestor and naturalistic causes at the time of

darwin over a century and a half ago no one knew the true complexity of the cell we now know the simplest of living organisms has 159 662 base pairs of dna and 182 protein coding genes what naturalistic cause put all of this together could this be assembled by blind purposeless accident what does recent science have to say and what about recent discoveries in origin of life research do we now know enough to suggest life could not have created itself a lot is happening in today s science that is best explained through the christian worldview let s see what some of today s scientists are now saying

bruce ledewitz proposes a reformation in secular thinking he shows that in opposition to today s aggressive atheism religious sources are necessary if secularism is to promote fulfilling human relationships and peaceful international relations amid signs that secularism is growing in unhealthy ways ledewitz proposes a new secular way to live
