how are processes of vision perception and sensation conceived in the renaissance how are those conceptions made manifest in the arts the essays in this volume address these and similar questions to establish important theoretical and philosophical bases for artistic production in the renaissance and beyond the essays also attend to the views of historically significant writers from the ancient classical period to the eighteenth century including plato aristotle plotinus st augustine ibn sina avicenna ibn al haytham alhazen ibn sahl marsilio ficino nicholas of cusa leon battista alberti gian paolo lomazzo gregorio comanini john davies rene descartes samuel van hoogstraten and george berkeley contributors carefully scrutinize and illustrate the effect of changing and evolving ideas of intellectual and physical vision on artistic practice in florence rome venice england austria and the netherlands the artists whose work and practices are discussed include fra angelico donatello leonardo da vinci filippino lippi giovanni bellini raphael parmigianino titian bronzino johannes gumpf and rembrandt van rijn taken together the essays provide the reader with a fresh perspective on the intellectual confluence between art science philosophy and literature across renaissance europe

advances in technology allow us to see the invisible fetal heartbeats seismic activity cell mutations virtual space yet in an age when experience is so intensely mediated by visual records the centuries old realization that knowledge gained through sight is inherently fallible takes on troubling new dimensions this book considers the ways in which seeing over time has become the foundation for knowing or at least for what

we think we know a joan saab examines the scientific and socially constructed aspects of seeing in order to delineate a genealogy of visuality from the renaissance to the present demonstrating that what we see and how we see it are often historically situated and culturally constructed through a series of linked case studies that highlight moments of seeming disconnect between seeing and believing hoaxes miracles spirit paintings manipulated photographs and holograms to name just a few she interrogates the relationship between visions and visuality this focus on the strange and the wonderful in understanding changing notions of visions and visual culture is a compelling entry point into the increasingly urgent topic of technologically enhanced representations of reality accessibly written and thoroughly enlightening objects of vision is a concise history of the connections between seeing and knowing that will appeal to students and teachers of visual studies and sensory social and cultural history

real life primary care case studies from more than 50 primary care providers including physician assistants nurse practitioners and physicians 101 primary care case studies offers real life patient scenarios and critical thinking exercises to help you work through a patient s chief complaint through narrative case studies you will determine how best to diagnose treat and manage your patient based on the history of present illness review of systems relevant history and physical examination findings this workbook will ask probing questions to help you determine differential and most likely diagnoses diagnostic tests to order and appropriate patient management strategies using relevant and timely references to support your decisions the organization of each case study simulates the patient care journey from chief complaint to outcome serving as a virtual clinical preceptor this workbook can be used independently or in a classroom setting it is accompanied by a robust online student supplement that provides answers to all questions real outcomes of the cases and valuable personal insights from the authors on how the patient was successfully managed not only will this workbook help you work through patient cases clinically it will also share important but often overlooked bedside manner skills needed to successfully communicate with and care for your patients covering conditions across all organ systems and across the lifespan this workbook is organized by chief complaint providing an authentic perspective on what to expect in the patient care environment it even includes information on pathophysiology and how to use icd 10 and cpt e m codes in your documentation the book uniquely weaves together both the science and art of medicine by including personal insights into quality and compassionate care key features provides real life patient cases from an interprofessional author team of physician assistants nurse practitioners and physicians uses a templated case study design and critical thinking exercises to help you methodically work through various patient scenarios teaches clinical and bedside manner skills imperative for delivering quality patient care covers patients across the lifespan including pediatric adolescent adult and geriatric populations offers additional insight on patient education medical and legal concerns and interprofessional collaboration includes a robust online student supplement with valuable insights from the authors on how they successfully managed the cases provides instructors with a table of contents that is filterable by chief complaint diagnosis patient population and organ system details changed to protect patient information

since the publication of the human genome project in 2001 and the development of genome wide association studies gwas there has been a major shift toward large scale international collaboration in genetic eye disease research eye researchers involved in genetics have now joined forces with traditional epidemiologists to develop the field of genetic epidemiology whilst ophthalmic geneticists had focused on rare pathogenic variants mutations with strong effects epidemiologists had focused on common gene variants with small but additive effects see figure 1 these two areas have now merged identifying a spectrum of genetic variants that are rare intermediate or common with strong medium or mild pathogenicity

contains the first printing of sartor resartus as well as other works by thomas carlyle

kepler s successful solution to the problem of vision early in the seventeenth century was a theoretical triumph as significant as many of the more celebrated developments of the scientific revolution yet the full import of kepler s arguments can be grasped only when they are viewed against the background of ancient medieval and renaissance visual theory david c lindberg provides this background and in doing so he fills the

gap in historical scholarship and constructs a model for tracing the development of scientific ideas. David C. Lindberg is professor and chairman of the department of the history of science at the University of Wisconsin-Madison.
