ships themselves as well as items of equipment ships monthly

in february 1942 six swordfish armed with torpedoes encountered heavy anti aircraft fire in the english channel and were shot down but not before two torpedoes were launched at a german battleship sailing at high speed this attack was part of a wider british effort to stop the battleships scharnhorst and gneisenau from making their way back to germany the scharnhorst is one of the most famous capital ships to have served with the kriegsmarine yet she and her sister ship gneisenau have been largely overshadowed by the bismarck and tirpitz despite the fact that they played a more proactive role in the second world war and were germany s most successful battleships this book provides an authoritative and informative look at the scharnhorst and gneisenau the first capital ships of the kriegsmarine from their conception through the first successful years of the second world war to their respective losses this is a detailed account of naval warfare against the royal navy off the coast of norway and the war against allied commerce from the german perspective

this volume explores the essence of german military professionalism as exemplified by the nineteenth century prussian german staff the study focuses on the most important prussian military reformer gerhard johann david von scharnhorst who in 1801 founded the militarische gesellschaft military society in berlin the gesellschaft became the focal point for the transformation of the prussian army from a robotic war machine into a modern fighting force that was instrumental in defeating napolean in 1813 and in 1815 the author examines the following elements of this military society its membership the specifics of its agenda the intellect imagination and habits of thought reflection and objective analysis of its members scharnhorst s particular contributions

the warships of the world war ii era german navy are among the most popular subject in naval history with an almost uncountable number of books devoted to them however for a concise but authoritative summary of the design history and careers of the major surface ships it is difficult to beat a series of six volumes written by gerhard koop and illustrated by klaus peter schmolke each contains an account of the development of a particular class a detailed description of the ships with full technical details and an outline of their service heavily illustrated with plans battle maps and a substantial collection of photographs these have been out of print for ten years or more and are

now much sought after by enthusiasts and collectors so this new modestly priced reprint of the series will be widely welcomed. Scharnhorst and Gneisenau the subject of this volume were the product of a long involved and politically determined design process that saw them develop from an improved pocket battleship to what many described as a battlecruiser although they were really fast battleships. They were the most active and successful of the Kriegsmarine's major warships taking part in numerous famous operations including the infamous Channel Dash.

Adolf Hitler had high hopes for his conquest of Norway which held both great symbolic and great strategic value for the Führer despite early successes. However his ambitious northern campaign foundered and ultimately failed. Adam Claassen for the first time reveals the full story of this neglected episode and shows how it helped doom the Third Reich to defeat. Hitler and Raeder the chief of the German Navy were determined to take and keep Norway by doing so they hoped to preempt allied attempts to outflank Germany, protect sea lanes for German ships, access precious Scandinavian minerals for war production and provide a launchpad for Luftwaffe and naval operations against Great Britain. Beyond those strategic objectives Hitler also envisioned Norway as part of a pan-nordic stronghold a centerpiece of his new world order. But as Claassen shows Hitler's grand expectations were never realized. The Luftwaffe was the vital spearhead in the invasion of Norway which marked a number of wartime firsts. Among other things it involved the first large scale aerial operations over sea rather than land. The first time operational objectives and logistical needs were fulfilled by air power and the first deployment of paratroopers. Although it got off to a promising start the German effort particularly against British and Arctic convoys was greatly hampered by flawed strategic thinking, interservice rivalries between the Luftwaffe and Navy, the failure to develop a long range heavy bomber, the diversion of planes and personnel to shore up the German war effort elsewhere and the northern theater's harsh climate and terrain. Claassen's study covers every aspect of this ill-fated campaign from the 1940 invasion until war's end and shows how it was eventually relegated to a backwater status. As Germany fought to survive in an increasingly unwinnable war his compelling account sharpens our picture of the German air force and widens our understanding of the Third Reich's way of war.

a beautifully illustrated study of the dramatic british german clash in the north sea that resulted in the sinking of the german battleship scharnhorst the german battleship scharnhorst had a reputation for being a lucky ship early in the war she fought off a british battlecruiser and sunk a carrier before carrying out two successful forays into the atlantic in the spring of 1943 the scharnhorst was redeployed to norway there working in concert with other german warships such as the battleship tirpitz she posed a major threat to the arctic convoys the allied sea lifeline to russia her presence alongside tirpitz forced the british to tie down ships in arctic waters when tirpitz was put out of action and hitler demanded naval support for the war in russia the crew of the scharnhorst under rear admiral bey had to act in late december 1943 she put to sea her target an allied convoy passing through the barents sea on its way to murmansk unknown to bey the british were using the convoy as bait to draw the scharnhorst into battle what followed was a two day running battle fought in rough seas and near perpetual darkness ending with the destruction of the scharnhorst and all but 36 of her crew ending any serious german naval threat to the arctic convoy lifeline leading naval historian angus konstam offers a fascinating new insight into this key engagement he combines expert analysis with his unique knack for storytelling to offer a fascinating new perspective on the battle which sank the scharnhorst
