the strength of this collection of essays is its careful consideration from a variety of perspectives within the catholic tradition of the practice of embryo adoption it approaches the question in an open and reasonable way by allowing proponents of diverse positions within the tradition this method both sheds a great deal of light on the particular question and at the same time introduces the reader to the relevant general principles that guide catholic moral thought

this volume of essays together with its companion creating the child the ethics law and practice of assisted procreation martinus nijhoff the hague 1996 isbn 90 411 0207 8 is the result of a concerted action in the biomed programme of the european commission which was coordinated by the editor clinicians lawyers and philosophers explore the theoretical and practical problems presented by the new technologies in assisted human reproduction in eastern central and western europe the central question of the status of the human embryo is examined in the light of recent biological discoveries and cultural and legal dissonance within and between the various countries in europe

is it acceptable from an ethical point of view to use stem cells from human embryos for scientific research and clinical therapy and what are the weaknesses and strengths of various opinions and positions when they are critically evaluated these are the main problems dealt with in this book the various chapters as a whole give a comprehensive many sided and balanced discussion of the subject the book contains contributions from biological medical social political philosophical and theological perspectives the authors have been chosen because of their professional competence many of them being respected scholars on a top international level they give an updated contribution from their own discipline in order to enlighten the different aspects of the common theme the authors cover various positions and evaluations with regard to the question of the use of embryonic stem cells for research and therapy the book is written for several audiences a scholars and professionals working with stem cell research or with the ethical questions arising from this field people from biology medicine law philosophy theology etc b advanced and graduate students within the same professional disciplines and c politicians and the general public interested in the burning ethical problems which are intensively debated in many countries

embryonic stem cell research holds unique promise for developing therapies for currently incurable diseases and conditions and for important biomedical research however the process through which embryonic stem cells are obtained involves the destruction of early human embryos katrien devolder focuses on the tension between the popular view that an embryo should never be deliberately harmed or destroyed and the view that embryonic stem cell research because of its enormous promise must go forward she provides an in depth ethical analysis of the major philosophical and political attempts to resolve this tension one such attempt involves the development of a middle ground position which accepts only types or aspects of embryonic stem cell research deemed compatible with the view that the embryo has a significant moral status an example is the position that it can be permissible to derive stem cells from embryos left over from in vitro fertilisation but not from embryos created for research others have advocated a technical solution several techniques have been proposed for deriving embryonic stem cells or their functional equivalents without harming embryos an example is the induced pluripotent stem cell technique through highlighting inconsistencies in the arguments for these positions devolder argues that the central tension in the embryonic stem cell debate remains unresolved this conclusion has important implications for the stem cell debate as well as for policies inspired by this debate

medical ethics is a difficult and controversial field and that part of it dealing with reproductive medicine is no exception our first conference on philosophical ethics in reproductive medicine perm 1 in 1988 discussed many of the controversies in this field the acclaim it received encouraged us to organise perm 2 but choosing a relevant and topical programme was a clairvoyant challenge in its own right since perm 1 we have seen a number of developments in the uk and internationally that have thrown the problems that

society must face into sharp relief drawing on the expertise of contributors from science many medical specialities philosophy theology and economics we have sought to address the issues raised by these new developments as well as a number of long standing issues that remain as contentious as ever but of undiminished significance on the scientific front the long predicted technique of embryo biopsy and diagnosis is now a reality this has prompted the inclusion of some of the topics addressed by this second conference
