this book examines the contested representations of those murdered during the spanish civil  
war of the 1930s in two small rural communities as they undergo the experience of  
exhumation identification and reburial from nearby mass graves based on interviews with  
relatives of the dead community members and forensic archaeologists it pays close attention  
to the role of excavated objects and images in breaking the pact of silence that surrounded the  
memory of these painful events for decades afterward it also assesses the significance of  
archaeological and forensic practices in changing relationships between the living and dead  
the exposure of graves has opened up a discursive space in spanish society for multiple  
representations to be made of the war dead and of spain s traumatic past

this book reflects on the new histories emerging from the exhumation of mass graves that contain the corpses of the republicans killed in extrajudicial executions during and after the conflict nearly eighty years after the end of the spanish civil war 1936 1939 in the search for location and unearthing of these unmarked burials the corpse the document and the oral testimony have become key traces through which to demand the recognition of past francoist crimes which were never atoned from a lukewarm spanish state and judiciary these have become objects of evidence against the politics of silence entertained by national institutions since the transition to democracy working alongside archaeologists historians memory activists and families this book explores how new versions of the history of the killings are constructed at the cross roads between science history and family experience it does so considering the workings of truth seeking in the absence of criminal justice and the effects of the process on spanish collective memory and identity

the franciscan subduction complex formed a long lived accretionary wedge of late jurassic through oligocene age that fringed the western edge of the north american cordillera this volume summarizes absolute finite strain data from the franciscan subduction complex and brittle strain data from important faults in and above this complex because the franciscan is generally considered a prototypical sediment rich subduction complex its tectonic evolution is important for understanding convergent plate margins and the results outlined in this volume may have broad implications for other subduction zone settings pub desc
