ever since its creation the united nations has sought to protect as well as to promote human rights those who campaigned for decades for the establishment of the post of high commissioner for human rights did so in the hope that the high commissioner would spearhead the efforts of the united nations and the international community to protect those at risk or whose rights are being violated how has the high commissioner contributed to international protection since the establishment of the office in 1993 this book the first ever written on the office since its establishment presents the protection role of the high commissioner it argues that limited protection functions are carried out by the security council the secretary general the commission on human rights and its special procedures and the high commissioner however international protection is still in its infancy and much more remains to be done to bring about a protection system that effectively anticipates and prevents gross violations contributes to mitigation and cure and facilitates remedies and compensation this is a valuable pioneering work in the area of the international protection of human rights

the development and study of human rights have increased significantly over time and have seen an intensified interest at the dawn of the twenty first century much can be learned about the status of universal human rights by approaching the subject from regional perspectives these diverse vantage points shed new light on the importance and complexity of the issues □ david p forsythe and patrice c mcMahon have brought together a collection of essays from top scholars in their fields each essay examines how a region as defined by geography or culture affects the standards and practice of human rights in a particular area the issues discussed include human rights and child labor in south asia women s rights in muslim states the prospects and challenges of human rights in the middle east the role of women and tradition in africa and accommodating diversity in europe the collection also includes essays commenting on the parameters and intersections of international human rights in relation to area studies

this book is designed to introduce law students legal actors and human rights activists particularly participants in human rights dialogues with china to the process and reality of a newly confident china s participation in the international human rights system albeit with inherent challenges from an international and comparative perspective one of the key findings of the author s research is that progress towards human rights depends more on judges than on legislators chinese legislators have enacted a series of reforms in order to better protect human rights unfortunately these reforms have not led to greater adherence to china s international human rights obligations in practice the reforms failed because they have generally been misunderstood by chinese judges who often have a limited understanding of international human rights norms specifically this book will examine how judicial misunderstandings have blocked reforms in one specific area the use of severe punishments based on international human rights theory and case studies and data analyses this examination has several purposes the first is to suggest that china ratify the iccpr as the next step for its substantive progress in human rights and as a good preparation for its re applying to be a member of the un human right council in the future the second is to explain how judges could be better educated in international human rights norms so as to greatly reduce

the use of severe punishments and better comply with china's human rights obligations the third is to demonstrate how the international community could better engage with china in a manner that is more conducive to human rights improvements the author's ultimate goal is to enhance dialogue on human rights in china between judges and the chinese government between chinese judges and their foreign counterparts and between china's government and the international community another significant aim of this book is to clarify the controversial question of what obligations china should undertake before its ratification of the iccpr and to re-examine trends in its developing human rights policy after standing down from the council in late 2012 the tortuous progress of china's criminal law and criminal justice reforms has confirmed that chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the iccpr in order to better educate and train judges this book contains introductory chapters that examine the severe punishments currently available to chinese judges from an international human rights perspective to illustrate how chinese justice currently falls short of international norms this paper also examines several cases that are considered to be indicative of china's progress towards greater respect for human rights and the rule of law these cases demonstrate that china still has a long way to go to achieve its goals at least before abolishing the death penalty forced labor and torture

the case of angola

this book is designed to provide a framework for understanding contemporary united nations un human rights machinery

this textbook provides a thorough and systematic overview of human rights law including the most relevant practice and case law but also dealing with theoretical issues it pursues an original approach seeking to reconcile its didactic purpose with a scientific one positing that there must be a necessary synergy between these two purposes furthermore the author is convinced that international human rights law should not be studied as is done in virtually every textbook as a special legal regime separate and autonomous from the overall system of international law but as a regime that is fully integrated into the international legal order the book s dominant theme is the interrelationship of international human rights law and general international law following this approach the author has chosen to devote comparatively little content to institutional issues part iv and to instead more intensively explore the structural impact of human rights law on the entire international order part i on the sources part ii and obligations part iii of general international law and what constitutes fundamental human rights part v without neglecting other rights part vi
