this authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence threats and reprisals some of the best international specialists on the subject examine terrorism's complex history from antiquity to the present day and find that terror long the weapon of the weak against the strong is a tactic as old as warfare itself beginning with the zealots of the first century ce contributors go on to discuss the assassins of the middle ages the 1789 terror movement in europe bolshevik terrorism during the russian revolution stalinism resistance terrorism during world war ii and latin american revolutionary movements of the late 1960s finally they consider the emergence of modern transnational terrorism focusing on the roots of islamic terrorism al qaeda and the contemporary suicide martyr along the way they provide a groundbreaking analysis of how terrorism has been perceived throughout history what becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over this updated edition includes a new chapter analyzing the rise of isis and key events such as the 2015 paris attacks

this book critically analyzes the criminalization of incitement to terrorism under the fundamental principles of legality necessity and proportionality with the aim of striking a fair balance between security and liberty on this complicated issue the criminalization of incitement to terrorism has gained momentum but no exact or generally accepted definition of this offense exists at the international level what's more given that the criminalization of incitement to terrorism results in restrictions on the exercise of citizens freedom of expression there should be certain limitations on those criminal measures to avoid unnecessary or disproportionate infringement of this fundamental human right nevertheless there has not been a precise standard by which to determine how to draw the line between anti terrorism and the protection of freedom of expression hence it could be concluded that the criminalization of incitement to terrorism concerns how to balance security and liberty and the safeguarding principles of legality necessity and proportionality should be fully observed in considering this issue this book studies definitions of incitement terrorism and incitement to terrorism under the relevant international and national legislation and points out the existing absence ambiguousness or substantive divergence in defining actus reus and mens rea regarding incitement to terrorism it carefully considers the current need for and essential limitations on criminal

measures against incitement to terrorism in accordance with the principles of necessity and proportionality and particularly focuses on how to balance the protection of freedom of expression with the criminalization of incitement to terrorism in considering how to draw a line between the two the book formulates precise requirements for objective and subjective elements of this offense in accordance with the principle of legality given its scope it will be of interest not only to academics human rights lawyers and practitioners but also to policymakers as it offers an extensive evaluation of the effects and counter effects of existing criminal measures

we are supposed to wage war against terrorism but exactly what we are fighting against in this war there is nearly no consensus about and much worse nearly nobody cares about this conceptual disaster the main thing being whether or not you are taking sides with the good guys this volume is an analytical attempt to end this disaster what is terrorism are terrorist acts to be defined exclusively on the basis of the characteristics of the respective actions or should we restrict such actions to acts performed by non state organisations and most important is terrorism already by its very nature to be morally condemned but having a clear idea of what terrorism is would be only the beginning rational moral assessment still needs two further components the relevant facts and the relevant values and norms now in a field where systematic disinformation has been even proclaimed to be the official policy facts are obviously very hard to get at this volume is mainly interested in ethics what s wrong with terrorism and what is morally right or morally wrong respectively with all the different means of counter terrorism what are the moral boundaries for waging war against terrorism what are the right ways of dealing with terrorists and what about the alleged anti terrorism wars on afghanistan and iraq with contributions from marcelo dascal tomas kapitan daniel messelken seumas miller olaf l mueller igor primoratz charles p webel per bauhne rüdiger bittner c a j tony coady haig khatchadourian georg meggel peter simpson carolin emcke ralf groetker laurence lustgarten thomas mertens aleksandar pavkovic filimon peonidis janna thompson véronique zanetti
