in a series of comparative essays on a range of texts embracing both high and popular

culture from the early modern era to the contemporary period the ideology of genre counters both formalists and advocates of the death of genre arguing instead for the inevitability of genre as discursive mediation at the same time Beebe demonstrates that genres are inherently unstable because they are produced intertextually by a system of differences without positive terms in short genre is the way texts get used to deny that genres exist is to deny in a sense the possibility of reading if genres exist on the other hand then they exist not as essences but as differences and thus those places within and between texts where genres collide reveal the connections between generic status interpretive strategy ideology and the use value of language

this book takes up issues of current concern in composition studies sociolinguistics and ESL issues concerning academic literacy critical literacy expressive versus cognitive approaches to the teaching of writing and the like it does so in a practical experiential way drawing on events in classrooms in universities in South Africa and the United States the contrast between the South African context and the American as well as their surprising parallels highlight certain questions concerning the teaching of literacy in a dramatic way so that theory and practice are brought together in contrast to writing programs that follow a textbook or a planned sequence of study the authors describe a narrative pedagogy that encourages students to find a direction and choose activities suggested by their own concerns and ongoing lives publisher

elements of sonata theory is a comprehensive richly detailed rethinking of the basic principles of sonata form in the decades around 1800 this foundational study draws upon the joint strengths of current music history and music theory to outline a new up

to date paradigm for understanding the compositional choices found in the instrumental works of Haydn, Mozart, Beethoven and their contemporaries: sonatas, chamber music, symphonies, overtures and concertos. In so doing, it also lays out the indispensable groundwork for anyone wishing to confront the later adaptations and deformations of these basic structures in the nineteenth and earlier twentieth centuries. Combining insightful music analysis, contemporary genre theory and provocative hermeneutic turns, the book brims over with original ideas, bold and fresh ways of awakening the potential meanings within a familiar musical repertory. Sonata theory grasps individual compositions and each of the individual moments within them as creative dialogues with an implicit conceptual background of flexible, ever-changing historical norms and patterns. These norms may be recreated as constellations, compositional defaults, any of which, however, may be stretched, strained or overridden altogether for individualized structural or expressive purposes. This book maps out the terrain of that conceptual background against which what actually happens or does not happen in any given piece may be assessed and measured. The elements guide the reader through the standard and less-than-standard formatting possibilities within each compositional space in sonata form while also emphasizing the fundamental role played by processes of large-scale circularity or rotation in the crucially important ordering of musical modules over an entire movement. The book also illuminates new ways of understanding codas and introductions, of confronting the generating processes of minor-mode sonatas and of grasping the arcs of multimovement cycles as wholes. Its final chapters provide individual studies of alternative sonata types, including binary sonata structures, sonata rondos and the first movement form of Mozart's concertos.

Among the most original and provocative musicological writers of his generation, James Hepokoski has elaborated new paradigms of inquiry for both music history and music theory, advocating fundamental shifts of methodological reorientation within the quest for potential musical meanings. His work spans both disciplines and offers substantial challenges for each. At its core is the conviction that a close study of musical genres, procedures and structures—those qualities of a composition that are specifically musical

is essential to any responsible hermeneutic enterprise selected from writings from 1984 to 2008 this collection of essays provides a generous introduction to the author's most innovative and influential work on a wide variety of topics musicological methodology issues of staging and performance italian opera program music and exemplary studies of individual pieces

adopting a multi disciplinary approach this comparative study of a selection of the arabian nights stories in a cross cultural context brings together a number of disciplines and subject areas to examine the workings of narrative it predominantly focuses on the ways in which the arabian nights have transformed as its stories have travelled across historical eras cultures genres and media departing from the familiar approaches of influence and textual studies this book locates its central inquiry in the theoretical questions surrounding the workings of ideology genre and genre ideology in shaping and transforming stories the ten essays included in this volume respond to a general question what can the transformation of nights stories in their travels tell us about narrative and storytelling and their function in a particular culture following a nights story in its travels from past to present from middle east to europe and from literature to film the book engages in close comparative analyses of ideological variations found in a variety of texts these analyses allow new modes of reading texts and make it possible to breach new horizons for thinking about narrative this book was previously published as a special issue of middle eastern literatures entitled ideological variations and narrative horizons new perspectives on arabian nights
