the language of creation is a commentary on the primeval stories from the book of genesis it is often difficult to recognize the spiritual wisdom contained in these narratives because the current scientific worldview is deeply rooted in materialism therefore instead of looking at these stories through the lens of modern academic disciplines such as sociology psychology or the physical sciences this commentary attempts to interpret the bible from its own cosmological perspective by contemplating the ancient biblical model of the universe the language of creation demonstrates why these stories are foundational to western science and civilization it rediscovers the archaic cosmic patterns of heaven earth time and space and sees them repeated at different levels of reality these fractal like structures are first encountered in the narrative of creation and then in the stories of the garden of eden cain and abel and the flood the same patterns are also revealed in the visions of ezekiel the book of daniel and the miracles of mooses the final result of this contemplation is a vision of the cosmos centered on the role of human consciousness in creation

while most treatments of biblical metaphor examine individual metaphors in isolation sarah j dille presents a model for interpretation based on their interaction with one another using lakoff and johnson s category of metaphoric coherence she argues that when nonconsistent or contradictory metaphors appear together in a literary unit the areas of overlap coherence are highlighted in each using the images of father and mother in deutero isaiah as a starting point she explores how these images interact with others for example the divine warrior the redeeming kinsman the artisan of clay or the husband the juxtaposition of diverse metaphors common in hebrew prophetic literature highlights common entailments enabling the reader to see aspects of the image which would be overlooked or invisible if read in isolation dille argues that any metaphor for god can only be understood if it is read or heard in interaction with others within a particular cultural context
