this study is based upon the concept of nations with history and nations without

history which was advanced in 1848 1849 in the pages of the *neue rheinische zeitung* a cologne based german newspaper under the editorship of karl marx this theory is presented in this study as a model of opposites historic nations and non historic nations respectively revolutionary nations and counter revolutionary national groups which engels and marx associated with the philosophy of hegel as marx and engels saw it hegel had taught that nature and history abounded in opposites and this was believed to be the essence of his dialectic marx liked this dialectic better than anything else in hegel s thought and modified it to fit his own economic theory of history in reality however there are no categories of opposites certainly not in nature no two colors are opposites nor are any two times of the day indeed nothing temporal nothing living nothing that is in process of becoming it is only in human understanding that opposites are introduced in the history of ideas what has been a misunderstanding of hegel s teachings has exerted a greater influence upon subsequent generations than hegel s philosophy as he himself understood it with marx s development of the materialistic concept of history the *volksgeist* spirit of the age so pronounced in hegel s work lost ground rapidly first because it was difficult to understand and second because its mastery was hardly rewarding to anyone save scholars and philosophers
