data is powerful it separates leaders from laggards and it drives business disruption transformation and reinvention today s most progressive companies are using the power of data to propel their industries into new areas of innovation specialization and optimization the horsepower of new tools and technologies have provided more opportunities than ever to harness integrate and interact with massive amounts of disparate data for business insights and value something that will only continue in the era of the internet of things and as a new breed of tech savvy and digitally native knowledge workers rise to the ranks of data scientist and visual analyst the needs and demands of the people working with data are changing too the world of data is changing fast and it s becoming more visual visual insights are becoming increasingly dominant in information management and with the reinvigorated role of data visualization this imperative is a driving force to creating a visual culture of data discovery the traditional standards of data visualizations are making way for richer more robust and more advanced visualizations and new ways of seeing and interacting with data however while data visualization is a critical tool to exploring and understanding bigger and more diverse and dynamic data by understanding and embracing our human hardwiring for visual communication and storytelling and properly incorporating key design principles and evolving best practices we take the next step forward to transform data visualizations from tools into unique visual information assets discusses several years of in depth industry research and presents vendor tools approaches and methodologies in discovery visualization and visual analytics provides practicable and use case based experience from advisory work with fortune 100 and 500 companies across multiple verticals presents the next generation of visual discovery data storytelling and the five steps to data storytelling with visualization explains the convergence of visual analytics and visual discovery including how to use tools such as r in statistical and analytic modeling covers emerging technologies such as streaming visualization in the iot internet of things and streaming animation

this book constitutes the refereed proceedings of the 4th european conference on principles and practice of knowledge discovery in databases pkdd 2000 held in lyon france in september 2000 the 86 revised papers included in the book correspond to the 29 oral presentations and 57 posters presented at the conference they were carefully reviewed and selected from 147 submissions the book offers topical sections on new directions rules and trees databases and reward based learning classification association rules and exceptions instance based discovery clustering and time series analysis

this volume contains 3 invited papers 15 regular papers and 22 poster papers that were selected for presentation at the third international conference on discovery science ds 2000 which was held 4-6 december 2000 in kyoto the program committee selected the contributed papers from 48 submissions three distinguished researchers accepted our invitation to present talks j frey d ullman stanford university joseph y halpern cornell university and masami hagiya university of tokyo the program committee would like to thank all those who submitted papers for consideration and the invited speakers i would like to thank the program committee members the local arrangements committee members and the steering committee members for their splendid and hard work finally special thanks go to the pc assistant shoko suzuki for her assistance in the development of web pages and the preparation of these proceedings september 2000 shinichi morishita organization discovery science 2000 is organized as part of the activities of the discovery science project sponsored by grant in aid for scientific research in the priority area from the ministry of education science sports and culture messc of japan in cooperation with the japanese society for artificial intelligence and with sig of data mining japan society for software science and technology

this book constitutes the refereed proceedings of the joint conference on machine learning and knowledge discovery in databases ecml pkdd 2009 held in bled slovenia in september 2009 the 106 papers presented in two volumes together with 5 invited talks were carefully reviewed and selected from 422 paper submissions in addition to the regular papers the volume contains 14 abstracts of papers appearing in full version in the machine learning journal and the knowledge discovery and databases journal of springer the conference intends to provide an international forum for the discussion of the latest high quality research results in all areas related to machine learning and knowledge discovery in databases the topics addressed are application of machine learning and data mining methods to real world problems particularly exploratory research that describes novel learning and mining tasks and applications requiring non standard techniques

context aware ranking is an important task with many applications e.g. in recommender systems items products movies and for search engines webpages should be ranked in all these applications the ranking is not global i.e. always the same but depends on the context simple examples for context are the user for recommender systems and the query for search engines more complicated context includes time last actions etc the major problem is that typically the variable domains e.g. customers products are categorical and huge the observations are very sparse and only positive events are observed in this book a generic method for context aware ranking as well as its application are presented for modelling a new factorization based on pairwise interactions is proposed and compared to other tensor factorization approaches for learning the bayesian context aware ranking framework consisting of an optimization criterion and algorithm is developed the second main part of the book applies this general theory to the three scenarios of item tag and sequential set recommendation furthermore extensions of time variant factors and one class problems are studied this book generalizes and builds on work that has received the www 2010 best paper award the wsdm 2010 best student paper award and the ecml pkdd 2009 best discovery challenge award

not so long ago china's civilization and art were only known to us through artifacts preserved in western museums and the origins of these treasures were often relatively obscure during the past thirty years however systematic excavation projects have been carried out in china isolated and previously unexplored sites have yielded fascinating treasures it has been possible to rediscover the tombs of emperors aristocrats and officials in their fullest splendor with all of their mortuary furnishings thus we are able to cite the mausoleum of qin shi huangdi the mortuary retinue at yangjiawan the winged horse of wuwei the tombs at mawangdui the frescoes in tang tombs the silver hoard of hejiacun the tombs of the monarchs of zhongshan and the bronzes and bells from leigudun these discoveries are extremely valuable because it has been possible to establish dates clarify historical information and enrich our knowledge of china's past this book will present an overview of all recent research and an inventory of these numerous and meaningful discoveries in order to perform this task properly the authors who are internationally recognized specialists visited china several times during the past few years and they have relied upon the most recent research and publications all of the items appearing in illustration within this book were discovered at archeological sites in china some of them have been exhibited during major expositions of chinese art and others have been reproduced for the first time outside china the appendices include a list of the principal archeological sites in china a chronology of the principal discoveries since 1950 and a bibliography consisting of recent published sources these are vital points of reference and resources for specialists and connoisseurs alike
