the mind of a mnemonist is a rare phenomenon a scientific study that transcends its data and in the manner of the best fictional literature fashions a portrait of an unforgettable human being

the intelligent mind conceives the psychological reality of thought and language explaining how intelligence develops from intuition to representation and then to linguistic interaction and thinking overcoming the prevailing dogmas regarding how discursive reason emerges this

book secures the psychological possibility of the philosophy of mind

the authors present clues locked within artifacts woven into oral tradition encrypted in ancient writing and embedded in the land itself which help to decipher some of ancient history's most intriguing cases

for nearly 25 years expertise has been considered an important testing ground for theories of cognition cognitive scientists have examined experts as diverse as chess masters waiters field hockey players and computer programmers recently increased attention has been given to the arts including dance music appreciation and performance and literary analysis it is therefore somewhat surprising that except for the authors program of research dating from the late 1980s virtually no studies on the cognitive processes of professional actors can be found in the literature these experts not only routinely memorize hours of verbal material in a very short time but they retrieve it verbatim along with the accompanying gestures movements thoughts and emotions of the characters the mental processes involved in this task constitute the subject of this recent research and are described in detail in this book

the latest whole earth catalog the usual jumble of fascinating books and gadgets topics here are computers audio video on line databases networks propaganda movies dance annotation copyrighted by book news inc portland or

this comprehensive volume is an essential resource for instructors of beginning courses in psychology reflecting the wisdom and creativity of many teachers of introductory psychology who contributed their ideas to the journal teaching of psychology the articles discuss a variety of issues and approaches as well as provide a large number of suggestions for classroom and extra classroom activities and demonstrations

the study of catastrophe is a growth industry today cosmologists scan the heavens for asteroids of the kind that smashed into earth some ninety million years ago leading to the swift extinction of the dinosaurs climatologists create elaborate models of the chaotic weather and vast flooding that will result from the continued buildup of greenhouse gases in the planet's atmosphere terrorist experts and homeland security consultants struggle to prepare for a wide range of possible biological chemical and radiological attacks aerated small pox virus spread by a crop duster botulism dumped into an urban reservoir a dirty bomb detonated in a city center yet strangely law's role in the definition identification prevention and amelioration of catastrophe has been largely neglected the relationship between law and other limiting conditions such as states of emergency has been the subject of rich and growing literature by contrast little has been written about law and catastrophe in devoting a volume to the subject the essays authors sketch the contours of a relatively fresh yet crucial terrain of inquiry law and catastrophe begins the work of developing a jurisprudence of catastrophe

the memory process offers a groundbreaking interdisciplinary approach to the understanding of human memory with contributions from both neuroscientists and humanists the first book to link the neuroscientific study of memory to the investigation of memory in the humanities it connects the latest findings in memory research with insights from philosophy literature theater art music and film chapters from the scientific perspective discuss both fundamental concepts and ongoing debates from genetic and epigenetic approaches functional neuroimaging connectionist modeling dream analysis and neurocognitive studies the humanist analyses offer insights about memory from outside the laboratory a taxonomy of memory gleaned from modernist authors including virginia woolf james joyce and william faulkner the organization of memory seen in drama ranging from hamlet to the glass menagerie procedural memory and emotional memory in responses to visual art music s dependence on the listener s recall and the vivid renderings of memory and forgetting in such films as memento and eternal sunshine of the spotless mind the chapters from the philosophical perspective serve as the bridge between science and the arts the volume s sweeping introduction offers an integrative merging of neuroscientific and humanistic findings

through readings of literary works legal opinions and treatises the affective life of law demonstrates that both law and literature are necessary complements in the efforts to take responsibility for the loss and damage inflicted by the first and second world wars
