winner engineer historian award from the american society of mechanical engineers navies have always been technologically sophisticated from the ancient world s trireme galleys and the age of sail s ships of the line to the dreadnoughts of world war i and today s nuclear powered aircraft carriers and submarines yet each large technical innovation has met with resistance and even hostility from those officers who adhering to a familiar warrior ethos have grown used to a certain style of fighting in technological change and the united states navy william m mcbride examines how the navy dealt with technological change from the end of the civil war through the age of the battleship as technology became more complex and the nation assumed a global role although steam engines generally made their mark in the maritime world by 1865 for example and proved useful to the union riverine navy during the civil war a backlash within the service later developed against both steam engines and the engineers who ran them early in the twentieth century the large dreadnought battleship at first met similar resistance from some officers including the famous alfred thayer mahan and their industrial and political allies during the first half of the twentieth century the battleship exercised a dominant influence on those who developed the nation s strategies and operational plans at the same time that advances in submarines and fixed wing aircraft complicated the picture and undermined the battleship s superiority in any given period argues mcbride some technologies initially threaten the navy s image of itself professional jealousies and insecurities ignorance and hidebound traditions arguably influenced the officer corps on matters of technology as much as concerns about national security and mcbride contends that this dynamic persists today mcbride also demonstrates the interplay between technological innovation and other influences on naval adaptability international commitments strategic concepts government industrial relations and the constant influence of domestic politics challenging technological determinism he uncovers the conflicting attitudes toward technology that guided naval policy between the end of the civil war and the dawning of the nuclear age the evolution and persistence of the battleship navy he argues offer direct insight into the dominance of the aircraft carrier paradigm after 1945 and into the twenty first century

great power competition has returned to the world stage and the u s navy finds itself in the forefront of u s efforts to demonstrate national resolve the u s navy case studies in its past present and future argues that the challenge of determining the future structure and operation of the fleet can be best achieved through an examination of its relevant past experience as well as from current operations of the navy after years of uncertainty as to its purpose and missions the rise of china and russian provocations now require u s officials to transform the fleet and its way of employing it the contributors to this edition provide case studies of past present and future challenges that the u s navy has and will need to overcome as it reconsiders how it will restructure the fleet and reconsider its prevailing concepts of operations contributors examine past challenges to structuring the fleet and its prevailing concepts of operation based on this foundation case studies propose how navy leadership should consider developing and employing the fleet in future the chapters in this book were originally published as a special issue of defense security analysis

this brisk narrative charts the history of the united states navy from its birth during the american revolution through its emergence as a global power amid the world wars of the twentieth century and finally to its current role as a superpower in the twenty first century

includes literature

the 200 year history of the u s navy is told vividly here in stirring authoritative prose which is dramatized by more than 400 carefully chosen illustrations

the 1980s have ushered in a new era for the u s navy despite projections that the number of ships it had at the start of the decade would decline the total is increasing and the navy is predicting that it will reach its long sought goal of a 600 ship navy by 1990 the numbers have risen but debate over the type of ships that should be constructed has not been resolved meanwhile recent developments in soviet shipbuilding have raised for the first time concerns about the possibility that the u s qualitative lead in naval technology may finally be slipping at the same time the international geostrategic situation and especially permanent u s deployments in the indian ocean and in the caribbean have led to increasing naval commitments these international developments have broad implications for the navy and the contributors to this volume provide a thorough reassessment at the midpoint of the decade
