the history of color photography goes back over one hundred years but the medium only came of age as an art form in the late 1960s when it was called the new frontiers

guiding new color new work was the premise that because photography propates images in a quantity and with a speed unknown to any other medium ideas are best realized in an extended series often the full value or impact of a photographer's work depends upon such a context accordingly these portfolios provide readers with a perception of the relationship of each image to others produced during the same period and make it possible to include photographs that function well as part of a

group but less will in isolation most important seeing an extensive body of work defuses speculation that single photographs might be the result of serendipity rather than an intentional summation of the photographer's ideas about life and art p 9

copublished by aperture and the milwaukee art museum

capturing the world in color was one of photography's greatest aspirations from the very beginnings of the medium when color photography became a reality with the introduction of the autochrome in 1907 prominent photographers such as alfred stieglitz were overjoyed but they quickly came to reject color photography as too aligned with human sight it took decades for artists to come to understand the creative potential of color and only in 1976 when john szarkowski showed william eggleson's photographs at the museum of modern art did the art world embrace color by accepting color's flexibility and emotional transcendence szarkowski and eggleson transformed photography giving the medium equal artistic stature with painting but also initiating its demise as an independent art the catalogue of a major exhibition at the amon carter museum of american art which holds one of the premier collections of american photography color tells for the first time the fascinating story of color's integration into american fine art photography and how its acceptance revolutionized the practice of art tracing the development of color photography from the first color photograph in 1851 to digital photography john rohrbach describes photographers initial rejection of color their decades long debates over what color brings to

photography and how their gradual acceptance of color released photography from its status as a second tier art form he shows how this absorption of color instigated wide acceptance of a fundamentally new definition of photography one that blends photography's documentary foundations with the creative flexibility of painting sylvie pénichon offers a succinct survey of the technological advances that made color in photography a reality and have since marked its multifaceted development these texts illuminated by seventy five full page plates and more than eighty illustrations make this book a groundbreaking contribution to photographic studies

the american photographer stephen shore is internationally best known as a part of the new color photography movement in the united states from the early 70th onwards shore made several road trips through the united states documenting american life the apparent banality of which caused incredible irritation among his contemporaries in this documentary shore gives a deep inside view in his understanding of photography the filmmaker ralph goertz was allowed to accompany shore over two years while he set up his shows in dublin and düsseldorf and in his class at the bard college
