one man's passion for perfume leads him to explore one of the most intriguing scientific mysteries what makes one molecule smell of garlic while another smells of rose in this witty engrossing and wildly original volume author luca turin explores the two competing theories of smell is scent determined by molecular shape or molecular vibrations turin describes in fascinating detail the science the evidence and the often contentious debate from the beginnings of organic chemistry to the present day and pays homage to the scientists who went before with its uniquely accessible and captivating approach to science via art the secret of scent will appeal to anyone who has ever wondered about the most mysterious of the five senses

to women the whole world over perfume means glamour and in the world of perfume jean claude ellena is a superstar in this one of a kind book the master himself takes you through the doors of his laboratory and explains the process of creating precious fragrances revealing the key methods and recipes involved in this mysterious alchemy perfume is a cutthroat secretive multibillion dollar industry and ellena provides an insider's tour guiding us from initial inspiration through the mixing of essences and synthetic elements to the deluxe packaging and marketing in elegant boutiques worldwide and even the increasingly complicated safety standards that are set in motion for each bottle of perfume that is manufactured he explains how the sense of smell works using a palette of fragrant materials and how he personally chooses and composes a perfume he also reveals his unique way of creating a fragrance by playing with our olfactory memories in order to make the perfume seductive and desired by men and women the world over perfume illuminates the world of scent and manufactured desire by a perfumer who has had clients the likes of cartier van cleef arpels bulgari and herméès

fox hunting the mystery of scent is a detailed treatise on scent being an exploration of the mysteries of scent in relation to fox hunting and hounds this volume will be of considerable utility to modern readers with a practical interest in hunting and it is not to be missed by collectors of vintage sporting literature contents include the secretion of scent the diffusion of scent the scentometer adverse factors the secret of scent scent and local conditions how we smell how hounds smell scent in other animals etc many vintage books such as this are becoming increasingly scarce and expensive it is with this in mind that we are republishing this volume now in a modern high quality edition complete with the original text and

artwork

the fascinating and mysterious world of scents and fragrances is freshly explained in a style that clearly demonstrates how their values can enhance our lives the author shows how our physical and mental health physical beauty moods and our personal image can all be enhanced and kept in better balance by a knowledge of and the informed use of aromas extending its advice to nominate scents for specific purposes this simple book is essentially practical and an ideal introduction to a topic that is too often presented in an over complicated way

dog scent tracking explores the fascinating world of canine olfaction revealing how dogs use their extraordinary sense of smell in various applications such as search and rescue and wildlife conservation it details the biological mechanisms behind a dog s ability to detect and track scents including how their olfactory system evolved from their wolf ancestors readers will discover that a dog s nose isn t just more sensitive than a human s it processes scent information in a fundamentally different way the book uniquely combines the biology of canine olfaction with the science of scent dispersal examining how environmental factors like weather and terrain affect scent tracking by understanding these factors handlers can optimize training methods and improve the effectiveness of detection canines the book progresses from the anatomy and physiology of the canine olfactory system to the practical applications of scent tracking including law enforcement medical scent detection and wildlife conservation

an authoritative guide from two experts who really know their way around scent funmi fetto the perfume companion is a beautifully illustrated compendium of almost 500 recommended scents designed to help you pick out your next favourite fragrance perfumes have the power to evoke treasured memories make us feel fabulous and help us express our best self but with so many out there how do you choose something new when the scents in the perfume shop are merging into one aromatic haze how do you remain focused and if your favourite scent goes out of stock how do you replace it the perfume companion is here to help sarah mccartney and samantha scriven deliver a host of scents for you to try including bargain finds and luxury treasures iconic stalwarts and indie newcomers the lightest florals and the deepest leathers with insider information about how perfumes are really made

discover hundreds of new fragrances and find the scents to share your own memories with this is the perfect companion for your scented adventures

although good devices exist for presenting visual and auditory sensations there has yet to be a device for presenting olfactory stimulus nevertheless the area for smell presentation continues to evolve and smell presentation in multimedia is not unlikely in the future human olfactory displays and interfaces odor sensing and presentation provides the opportunity to learn about olfactory displays and its odor reproduction covering the fundamental and latest research of sensors and sensing systems as well as presentation technique this book is vital for researchers students and practitioners gaining knowledge in the fields of consumer electronics communications virtual realities electronic instruments and more

why couldn't i be a perfumer's muse i've come such a long way in the realm of scent in fact i was never really meant to poke my nose into it the perfume lover by denyse beaulieu is an intimate journey into the mystery of scent

this book will make you a perfume insider discover the effects trends and future of perfume perfumery is on the verge of its third revolution neuroperfumery due to new methods of brain research and current findings in fragrance psychology with this exciting and well written book you will gain a comprehensive insight into the creation world and practice of modern perfumery as well as interesting insider information current findings in psychology aromatherapy brain research and neuroperfumery on the effects of fragrances make beautiful scent a treasure trove of new insights as a non fiction book with an advice component it is easy to read without prior knowledge and provides many practical tips among other things you will learn that some perfumes can do much more than just smell good how perfumers and marketers create their perfumes which scent preferences prevail and how the effect of scent can specifically influence one's own experience and enjoyment of life target groups all those who love perfumes and fragrances and would like to learn more about the magical effect of perfumes on well being and perhaps play with the idea of creating their own perfume one day it is also ideal for those who work in the fragrance cosmetics and beauty industry and would like to refresh their knowledge of perfumes about the author dr joachim mensing is a qualified psychologist sociologist and trained nose with over 30 years of professional experience in perfumery and fragrance therapy at one of the largest fragrance

manufacturers he became a trend coach for perfumers and developed methods of perfume development and marketing many of the perfumes he worked on received coveted awards such as the fifi award the oscar for perfumes he himself received the honorary award of the fragrance foundation for the development and marketing of the perfumes cool water by davidoff joop and jil sander and he was also recognized for studies in neuroperfumery and neuropsychology the translation was done with the help of artificial intelligence a subsequent human revision was done primarily in terms of content

scientists and researchers generally agree that smell was the first of the five senses that humans developed and yet day to day we pay little attention to how our sense of smell works and don't really understand how it is so intimately connected to our experience of the world around us written by christopher brosius founder of demeter fragrance library this book will explore the intersection between scent science and psychology in an attempt to unravel the mystery surrounding our most neglected sense the topics covered include how do we recognize smells how do we store memories of scents why do we find some smells appealing and others not how do we explain why scents are closely linked to emotions the book will also examine the ways that scent fits into people's lives brosius uses a combination of scientific research and engaging anecdotal information to make the text lively and easily accessible to even the science impaired the scents included will be printed on microencapsulated stickers applied to individual cards and packaged within a pocket in the front and back endsheet of the book each scent card will include a name color and the scent the scent illustrat

magic was a fundamental part of the greco roman world curses erotic spells healing charms divination and other supernatural methods of trying to change the universe were everyday methods of coping with the difficulties of life in antiquity while ancient magic is most often studied through texts like surviving greco egyptian spellbooks and artifacts like lead curse tablets for a greek or roman magician a ritual was a rich sensual experience full of unusual tastes smells textures and sounds bright colors and sensations like fasting and sleeplessness greco roman magical rituals were particularly dominated by the sense of smell both fragrant smells and foul odors ritual practitioners surrounded themselves with clouds of fragrant incense and perfume to create a sweet and inviting atmosphere for contact with the divine and to alter their own perceptions they also used odors as an instrumental weapon to attack

enemies and command the gods elsewhere odiferous herbs were used equally as medical cures and magical ingredients in literature scent and magic became intertwined as metaphors with fragrant spells representing the dangers of sensual perfumes and conversely smells acting as a visceral way of envisioning the mysterious action of magic the scent of ancient magic explores the complex interconnection of scent and magic in the greco roman world between 800 bce and ce 600 drawing on ancient literature and the modern study of the senses to examine the sensory depth and richness of ancient magic author britta k ager looks at how ancient magicians used scents as part of their spells to put themselves in the right mindset for an encounter with a god or to attack their enemies through scent ager also examines the magicians who appear in ancient fiction like medea and circe and the more metaphorical ways in which their spells are confused with perfumes and herbs this book brings together recent scholarship on ancient magic from classical studies and on scent from the interdisciplinary field of sensory studies in order to examine how practicing ancient magicians used scents for ritual purposes how scent and magic were conceptually related in ancient literature and culture and how the assumption that strong scents convey powerful effects of various sorts was also found in related areas like ancient medical practices and normative religious ritual

aromas are an integral part of our civilised society they are not only used in fine perfumes but also in numerous other articles with which we have daily contact another new development has been the agricultural use of aromas as a biological weapon to combat insects and other pests in the field of dermatology aromas are today among the most frequent sensitizers and may trigger allergic contact eczemas this volume presents numerous aspects of the topic for the first time in comprehensive form in an introduction the chemistry of frequently used aroma components is described together with the art of perfume composition that has been refined over the centuries in a chapter on neuropharmacology the mechanisms of scent recognition are described in detail
