this cutting edge book considers how advances in technologies and new media have transformed our perception of education and focuses on the impact of the privatisation of digital tools as a mean of knowledge production arguing that education needs to adapt to the modern learner the book s unique approach is based on a disassociation with the deeply ingrained attitude with which people have traditionally viewed education learning the existing symbolic systems of certain disciplines and then expressing themselves strictly within the operational modes of these systems the ways of knowledge production exploring recording representing making meaning of and sharing human experiences have been fundamentally transformed through the infusion of digital technologies into all aspects of human activity allowing learners to engage with their immediate natural social and cultural environments by capitalising on their individual abilities and interests this book proposes a new approach to teaching and learning termed cinematic bricolage which involves generating knowledge from heterogeneous resources in a do it yourself manner while making meaning through multimodal representations it shows how cinematic bricolage reconnects ways of knowing with ways of being empowering the individual with a sense of personal identity and responsibility helping to shape more aware social citizens

in the internet as a game jill anne morris proposes that by defining internet arguments as games we can analyze ad hominem and ad baculum arguments coming from online mobs and trolls using procedural rhetoric building upon and extending ian bogost s definition of procedural rhetoric and jesper juul s definition of games morris extends the usage of the term into human systems and groups that have proceduralized their arguments online by studying the development of online adhocracies such as 4chan anonymous and even reddit during their early development roughly 2006 to 2014 morris shows how these groups have proceduralized rhetoric so that thousands of group members can 'speak' with a single voice and singular name that they call anonymous morris examines these techniques to reveal their function and purpose as rhetoric understanding how internet arguments work can also positively affect pedagogy especially now as social media and memes have been used to influence national elections our views of the news and our views of each other can we continue to teach only traditional rhetoric in classrooms when students will face arhetorical tropes and logic in their personal and professional

the election of donald trump was a shattering moment to the political sensibilities of america immediately sending the country into a frenzy of commentary critique and a never ending media coverage that has bordered on the absurd but the question

still remains what does it all mean the meaning of trump is an ideological critique that sees the election of donald trump as a completely natural progression to the general trajectory of digitized technologies neoliberalism and a new breed of financialized capitalism destructive global forces that know no party affiliation or national boundary although donald trump is undoubtedly the symptom that has exploded to the surface after nearly four decades of failed policies and broken promises by both republicans and democrats alike his election can also be seen as an existential fork in the road for both the united states and even humanity itself what path is taken still remains to be seen
