this title was first published in 2001 synopsis the essentials of project management is a primer assembled from dennis lock s comprehensive book project management it provides a concise straightforward account of the principles and techniques of project management designed to meet the needs of the non specialist this second edition reflects the changes made for the seventh edition of project management the ideal introduction for anyone responsible for managing projects as well as students

in recent years there has been a steep rise in demand for good project managers both textbooks and books aimed at the practitioner continually cover the same ground the abcs of project management you might call it but anyone who has ever managed a project or overseen the management of a project in the real world knows that there is a significant difference between mastering the abcs and mastering the practice of project management itself it s not that the formal methodologies don t work but rather that it s only half of the picture to go from good to great in project management you need to shift your focus back to the real basics of management in this illuminating book richard newton a successful project manager with twenty years experience shows you several ways you can elevate your game

do you want to know about how to be a project manager in few years do you want to know how to manage a project easily do you want to know the importance of managing a project if you are interested in any of these question then this book is perfect for you the fundamentals of project management are discussed in this book this entails the initiation preparation delivery control and close out process shared by all projects this area of project management includes ensuring that the project has adequate human capital for the project to be efficiently executed with the right skill sets and expertise the project functions duties necessary skills and reporting relationships required for project progress are outlined in this plan which contains project organization maps and employee acquisition and releases plans and can also include preparation requirements detection team building techniques recognition systems enforcement concerns and safety concerns within the implementing process community the process of acquiring a project team takes place and is concerned with confirming the availability of human capital and securing the workers required to execute project assignments the acquisition of the project team is also compounded by the fact that the project management team typically does not have full influence over anyone who wants to engage in the project they may need to coordinate with those who are in a position to have the required amount of expertise and skill with the right number of people by using transparent and efficient communication creating trust among team members resolving disagreements in a productive way and promoting collaborative problem solving and decision making team success can be developed this includes monitoring the success of team members providing input fixing conflicts and handling improvements to improve project performance human resources management is perhaps one of the most challenging environments as individuals may be volatile may give rise to an inevitable confrontation the level of their confidence may rise or fall and of course others can leave the project unplanned for either personal or professional purposes there are two major conflicts which the management of human resources attempts to solve the first is the dilemma between getting the project s job completed as soon as possible and the need to improve the project team members skills and competencies the second conflict is about choosing and treating individuals according to the expertise needed by the project and managing them as individuals with personal and job needs of their own at least half of their working day will be occupied by the project manager engaging with project team members and other stakeholders communication skills are as important as planning skills and other technical skills in the management of projects in comparison to technological sectors such as evaluation and risk management coordination is something about which the project manager must take full personal responsibility the lack of a coordination strategy is always the project manager s greatest single error because it takes teamwork to successfully

complete a complicated project and teamwork requires good communication
