concepts to be developed into products and how they generate new business and satisfy human needs employing a multi faceted perspective the book supplies the reader with a comprehensive worldview of design in the form of a proposed model that will empower their activities as student researcher or practitioner we draw the reader into the core role of design conceptualisation for society for the development of industry for users and buyers of products and for citizens in relation to public systems the book also features original contributions related to exploration conceptualisation and product synthesis exploring both the power and limitations of formal design process models methods and tools viewed in the light of human ingenuity and cognition the book develops a unique design mindset that adds human understanding to the list of methods and tools essential to design this insight is distilled into useful mindset heuristics included throughout the book

wilson describes the techniques of conceptual analysis and gives examples of them in action

this study provides a new interpretation of art after modernism by foregrounding the importance of conceptual thinking as a pervasive force for change in art and art history since 1950 robert bailey shows how distinctions between art and art history gave way as conceptual thinking provided artists and art historians with a common means to reassess what art could be and do in the world bailey assesses the results of artful and scholarly inquiries combining creative activity with intellectual rigor to proffer new approaches to a variety of social and environmental concerns ranging from questions about human identity including race class gender and sexuality to activist efforts to redress everything from abortion access to migrants rights to climate change this book provides both a historical overview of these developments and close analyses of key works and texts spanning 1950 to the present and encompassing broad geographic scope with special attention paid to indigenous art the book will be of interest to scholars working in

art history and contemporary art

only human beings have a rich conceptual repertoire with concepts like tort entropy abelian group mannerism icon and deconstruction how have humans constructed these concepts and once they have been constructed by adults how do children acquire them while primarily focusing on the second question in the origin of concepts susan carey shows that the answers to both overlap substantially carey begins by characterizing the innate starting point for conceptual development namely systems of core cognition representations of core cognition are the output of dedicated input analyzers as with perceptual representations but these core representations differ from perceptual representations in having more abstract contents and richer functional roles carey argues that the key to understanding cognitive development lies in recognizing conceptual discontinuities in which new representational systems emerge that have more expressive power than core cognition and are also incommensurate with core cognition and other earlier representational systems finally carey fleshes out quinian bootstrapping a learning mechanism that has been repeatedly sketched in the literature on the history and philosophy of science she demonstrates that quinian bootstrapping is a major mechanism in the construction of new representational resources over the course of childrens cognitive development carey shows how developmental cognitive science resolves aspects of long standing philosophical debates about the existence nature content and format of innate knowledge she also shows that understanding the processes of conceptual development in children illuminates the historical process by which concepts are constructed and transforms the way we think about philosophical problems about the nature of concepts and the relations between language and thought

just peace has been much talked about in everyday life but it is less well researched by academics the rationale of this book is therefore to probe what constitutes a just peace both

conceptually within the field of peacebuilding and empirically in the context of the eu as a peacebuilder in the israeli palestinian conflict the eu has used the term just peace in many of its most important declarations on the israeli palestinian conflict throughout the years defining a just peace is about these declaratory efforts by the eu to articulate a common formula of a just peace in the conflict securing and building a just peace are about the eu s role in implementing this formula for a just peace in the conflict through the creation of a palestinian state as the eu enters its fifth decade of involvement in the conflict there can be little doubt that in common with the rest of the international community it has failed in its efforts to establish a just peace between israelis and palestinians while this is an inescapable overall conclusion from four decades of ec eu peacebuilding in the conflict it is at the same time possible to draw a number of other conclusions from this book most importantly it argues that the eu is a major legitimizing power in the conflict and that it has kept the prospects of a two state solution alive through its support for the palestinian statebuilding process

poetry has long been thought of as a genre devoted to grand subjects timeless themes and sublime beauty why then have contemporary poets turned with such intensity to documenting and capturing the everyday and mundane drawing on insights about the nature of everyday life from philosophy history and critical theory andrew epstein traces the modern history of this preoccupation and considers why it is so much with us today attention equals life argues that a potent hunger for everyday life explodes in the post 1945 period as a reaction to the rapid

unsettling transformations of this epoch which have resulted in a culture of perilous distraction epstein demonstrates that poetry is an important and perhaps unlikely cultural form that has mounted a response and even a mode of resistance to a culture suffering from an acute crisis of attention in this timely and engaging study epstein examines why a compulsion to represent the everyday becomes predominant in the decades after modernism and why it has so often sparked genre bending formal experimentation with chapters devoted to illuminating readings of a diverse group of writers including poets associated with influential movements like the new york school language poetry and conceptual writing the book considers the variety of forms contemporary poetry of everyday life has taken and analyzes how gender race and political forces all profoundly inflect the experience and the representation of the quotidian by exploring the rise of experimental realism as a poetic mode and the turn to rule governed everyday life projects attention equals life offers a new way of understanding a vital strain at the heart of twentieth and twenty first century literature it not only charts the evolution of a significant concept in cultural theory and poetry but also reminds readers that the quest to pay attention to the everyday within today s frenetic world of and social media is an urgent and unending task
