the american founders designed a constitution for governance of the united states based on the idea that citizens are sovereign and that function of government is to protect their pursuit of life liberty and happiness this book calls the original system version 3 0 and discusses five basic political principles required for a modern government to accomplish that function these principles were either explicit or implicit at the founding however the united states has deviated from these principles over time and today the federal government is doing many of the things the constitution sought to protect against congress is in a position much like the programmers of a computer operating system that seek to increase the functionality of the system and to ward off attacks from viruses however not only have they passed laws that take away from the citizen s abilities to pursue life liberty and happiness they

have also introduced various viruses that threaten the existence of the entire system this book describes how we can eliminate these viruses infecting the system and update the u s government to version 4 0 allowing u s citizens to pursue life liberty and happiness thereby producing a solid foundation for a strong and durable society in which all can freely prosper there are several conclusions that run against the current prevailing views the most significant conclusion involves the relationship of the government to the economy several principles adopted as prevailing economic wisdom in both the republican and democratic parties are considered harmful to the pursuit of life liberty and happiness of citizens and harmful to the society as a whole there are many books on reforming the u s government which a majority of americans consider to be broken however there is no comprehensive systematic vision based on these core principles of government rather most approaches are patches on symptoms produced by not adhering to these fundamental principles in the first place

the present world book of happiness is certainly one of the milestones towards building up a universal model of happiness in this challenging book the world book of happiness 100 top experts in positive psychology from around the world from iceland to south africa and china to australia share the best way to find and keep happiness this modern science has gained considerably in knowledge and standing in recent decades without philosophical or spiritual speculations this book provides clear insights based on worldwide scientific research the subjects tackled include time health success well being the future compassion genetics free will humour pain choice family friends and more it not only explores the individual but also the well being of organizations and nations resulting in a unique global vision of happiness

this book is about the degree to which people take pleasure in life in short happiness it tries to identify conditions that favor a positive appreciation of life thus it hopes to shed more light on a longstanding and intriguing ques tion and possibly to guide attempts to improve the human lot during the preceding decades a growing number of investigations have dealt with this issue as a result there is now a sizable body of data yet it is quite difficult to make sense of it there is a muddle of theories concepts and indicators and many of the findings seem to be contradictory this book attempts to bring some order into the field the study draws on an inventory of empirical investigations which involved valid indicators of happiness 245 studies are involved which together yield some 4000 observations for the main part correlational ones these results are presented in full detail in the simultaneously published databook of happiness veenhoven 1984 the present volume distils conclusions from that wealth of data it tries to assess the reality value of the findings and the degree to which correlations reflect the conditions of happiness rather than the consequences of it it then attempts to place the scattered findings in context as such this work is not a typical study of literature

on happiness

once associated with the politics of liberation identity has since become a more private and individualistic affair about what we buy and how we look this book is about rethinking the idea of the individual and ethical life after identity it addresses these questions in a series of essays on being an individual why people fear and hate asylum seekers memories of england masculinity and the war on terror climate change and ecological ethics and the revolution in ageing

the author analyzes evidence and empirical research to determine which groups are the happiest in america and offers suggestions on how the government can help individuals maximize their happiness
