backed by the most up to date scientific research the science of parenting 2nd edition provides evidence based parenting advice about how you should care for your child with practical strategies from birth to 12 years of age child psychotherapist dr margot sunderland has more than 30 years experience that she brings to this internationally acclaimed guide and she provides numerous case studies to relate the science to real life from separations and time apart to forms of discipline to the latest thinking on screen time this guide traces the direct effect of different parenting practices on your child s brain summaries at the end of every chapter provide key takeaways and make action points simple and clear so you can begin to implement them immediately as a professional who works with families dr sunderland is attuned to the struggle of parents juggling lives at work and at home this second edition of the science of parenting provides newly added invaluable advice on making the most of your time with your child so that you can forge a strong bond and have a positive relationship the science of parenting remains the greatest work on what science can teach us about parenting and the remarkable effects of love nurture and play on a child s development

it s time to re write the rule book on raising a child based on over 700 scientific studies into children s development bma award winning author and child psychotherapist dr margot sunderland explains how to develop your child s potential to the full find out the truth about popular childcare tactics how touch laughter and play build emotional wellbeing for life and the strategies for effectively dealing with temper tantrums and tears this is the first practical parenting book to give you the facts not the fiction on the best way to bring up your child essential for any parent

everyone has an opinion on parenting where babies should sleep what they should eat and whether parents should spank scold or praise what s more the media often offers support for whichever

opinions appear most popular at any given time this leaves those of us who like to base our decisions on firm provable facts feeling dizzy a companion to the science of parenting addresses this confusion by moving beyond the chatter and opinion surrounding parenting and by looking directly at the science parenting itself is far from a science nevertheless scientists have conducted thousands of studies that can help parents or future parents make sensible informed decisions this short book captures a series of micro lectures by dr david barner professor of psychology at uc san diego sampled from the online edx class the science of parenting the goal of these micro lectures is to survey and skeptically analyze important scientific debates spanning a range of topics that are central to the lives of parents dietsleepdisciplinelearningscreen timeimpulse controlvaccinationdr barner also explores ongoing mysteries like what causes autism and why so many children are allergic to peanuts most important the book not only digs into existing science but also explores the underlying nature of parenting science itself often scientists measure correlations they ask how different parenting practices are related to different behaviors in children but the claims they make from correlational data are often much much stronger for example from correlational data scientists often claim that parents cause the behaviors of their kids this books shows how this type of error common in the scientific literature can explain a significant amount of the confusion present in the media and general public it discusses how to avoid the same error when evaluating science and how to use the sum of available evidence to inform decision making dr barner a leading authority on language mathematics education and cognitive development is professor of psychology at the university of california san diego

an introduction to the art of parenting furnishes practical parenting techniques and strategies advice and suggestions for every stage in a child s development along with real life anecdotes and tips to help insure a child s physical emotional and psychological well being

this paper aims to help better communicate the evidence around effective parenting though researchers are learning more and more about effective caregiving practices people are resistant to research based messages because they see parenting as an individual rather than a societal issue and not as a skill that can be learned or is associated with science messages can also be perceived as attacks on people s identity this paper argues that communicators should move from framing messages as about improving parenting to one of supporting child development the paper draws on research conducted by the frameworks institute in partnership with the parenting research centre to begin interviews were held with with 10 researchers practitioners and policy experts a review of the literature was conducted and interviews were held with with 90 members of the public on cultural understandings and beliefs about parenting a set of frames were then developed and tested in a survey of over 7 000 members of the public

now updated the new edition of this best selling guide uses science to tackle some of the most important decisions facing new parents from sleep training and vaccinations to breastfeeding and baby food is cosleeping safe how important is breastfeeding are food allergies preventable should we be worried about the aluminum in vaccines searching for answers to these tough parenting questions can yield a deluge of conflicting advice in this revised and expanded edition of the science of mom alice callahan a science writer whose work appears in the new york times and the washington post recognizes that families must make their own decisions and gives parents the tools to evaluate the evidence for themselves sharing the latest scientific research on raising healthy babies she covers topics like the microbiome attachment vaccine safety pacifiers allergies increasing breast milk production and choosing an infant formula

selected as a book of the year by the financial times the gardener and the carpenter should be required reading for anyone who is or is thinking of becoming a parent financial times caring

deeply about our children is part of what makes us human yet the thing we call parenting is a surprisingly new invention in the past thirty years the concept of parenting and the huge industry surrounding it have transformed childcare into obsessive controlling and goal orientated labour intended to create a particular kind of child and therefore a particular kind of adult drawing on the study of human evolution and her own cutting edge scientific research into how children learn gopnik shows that although caring for children is profoundly important it is not a matter of shaping them to turn out a particular way children are designed to be messy and unpredictable playful and imaginative and to be very different both from their parents and from each other the variability and flexibility of childhood lets them innovate create and survive in an unpredictable world parenting won t make children learn but caring parents let children learn by creating a secure loving environment in the gardener and the carpenter the pioneering developmental psychologist and philosopher alison gopnik argues that the familiar twenty first century picture of parenting is profoundly wrong it s not just based on bad science it s bad for children and their parents too

the world s leading expert on prenatal and early postnatal child development explains how the infant brain develops in the womb and what parents can do to give their infant the best start in life

a 3 book collection of our most popular parenting humor titles science of parenthood thoroughly unscientific explanations for utterly baffling parenting situations the big book of parenting tweets and the bigger book of parenting tweets

using a process approach this in depth introduction to parenting children from birth through adolescence includes the theories and practical strategies for how parents and caregivers can establish secure and close emotional relationships with their children the book focuses on two basic tasks of parenting creating close emotional relationships with children and establishing effective

limits for children it shows how parents carry out these tasks with children of different ages and with changing life circumstances i e working parents divorce each chapter includes a section on the joys of parenting reinforcing the positive aspects of being a parent

parenting has never been as tough as it is today modern life has excessive distractions excessive independence excessive materialism and diminishing spiritual values this has made parenting complex enough for parents to wake up to the fact that it is time to seek help this easy read will help parents to find answers to the questions that come up at various stages in the intriguing journey of raising children the inevitable consequence of which is growing up along with them

backed by the most up to date scientific research the science of parenting 2nd edition provides evidence based parenting advice about how you should care for your child with practical strategies from birth to 12 years of age child psychotherapist dr margot sunderland has more than 30 years experience that she brings to this internationally acclaimed guide and she provides numerous case studies to relate the science to real life from separations and time apart to forms of discipline to the latest thinking on screen time this guide traces the direct effect of different parenting practices on your child s brain summaries at the end of every chapter provide key takeaways and make action points simple and clear so you can begin to implement them immediately as a professional who works with families dr sunderland is attuned to the struggle of parents juggling lives at work and at home this second edition of the science of parenting provides newly added invaluable advice on making the most of your time with your child so that you can forge a strong bond and have a positive relationship the science of parenting remains the greatest work on what science can teach us about parenting and the remarkable effects of love nurture and play on a child s development

this book is an indispensable source of guidance and wisdom on the most critical challenges facing

contemporary parents and grandparents it should be read by parents and grandparents physicians child and family therapists teachers child development specialists and anyone committed to the well being of children and families
