this book offers a new approach to the use of linguistic data to reconstruct prehistory
the author shows how a well studied language family in this case uto aztecan can be
used as an instrument for reconstructing prehistory the main focus of shaul s work is
the mapping of uto aztecan by presenting various models of uto aztecan prehistory by
assessing multiple models simultaneously and by guiding readers through areas
where the evidence is not so clear shaul helps nonspecialists develop the tools
needed for evaluating various historical linguistics models themselves he evaluates
both archaeological and genetic evidence as well placing it carefully alongside the
linguistic evidence he knows best shaul s thorough treatment provides many new
avenues for future research on the historical anthropology of western north america

the environmental diversity of north america is astounding from circumpolar tundra
with a small number of plants more than a few centimeters tall to the lush semitropical
forests of the southeastern united states and the caribbean basin no less remarkable
is the record of plant usage by the various indigenous peoples who have been living
here for more than 12 000 years for the vast majority of this time their livelihood food
shelter fuel and medicine depended on their knowledge and use of the plants that
surrounded them the most comprehensive overview in more than half a century on
the interconnectedness of people and plants this book and its companion volume
people and plants in ancient eastern north america present the latest information on
three major topics the uses of native plants the history of crops and their uses and the
impact of humans on their environment they not only contribute to our understanding
of the lives of prehistoric people but also serve as guides for designing sustainable
living today
