this study elucidates the biological and behavioural processes leading to the successful adaptation of circumpolar human populations

since the first edition of this landmark book was published in 1962 everett rogers s name has become virtually synonymous with the
study of diffusion of innovations according to choice the second and third editions of diffusion of innovations became the standard
textbook and reference on diffusion studies now in the fourth edition rogers presents the culmination of more than thirty years of
research that will set a new standard for analysis and inquiry the fourth edition is 1 a revision of the theoretical framework and the
research evidence supporting this model of diffusion and 2 a new intellectual venture in that new concepts and new theoretical
viewpoints are introduced this edition differs from its predecessors in that it takes a much more critical stance in its review and
synthesis of 5 000 diffusion publications during the past thirty years or so diffusion research has grown to be widely recognized applied
and admired but it has also been subjected to both constructive and destructive criticism this criticism is due in large part to the
stereotyped and limited ways in which many diffusion scholars have defined the scope and method of their field of study rogers
analyzes the limitations of previous diffusion studies showing for example that the convergence model by which participants create and
share information to reach a mutual understanding more accurately describes diffusion in most cases than the linear model rogers
provides an entirely new set of case examples from the balinese water temple to nintendo videogames that beautifully illustrate his

expansive research as well as a completely revised bibliography covering all relevant diffusion scholarship in the past decade most important he discusses recent research and current topics including social marketing forecasting the rate of adoption technology transfer and more this all inclusive work will be essential reading for scholars and students in the fields of communications marketing geography economic development political science sociology and other related fields for generations to come

in this important mba text the authors adopt a highly integrated approach using the three conceptual lenses of power meaning and design they explore fully the many different ways in which technology and organizations interact they highlight the major debates within these competing perspectives and argue that the flow of knowledge and ideas within and between organizations is crucial in shaping technologies and organizations alike

this book examines the diverse use of indigenous customary rights in modern landscapes from a multidisciplinary perspective divided into two parts the first deals explicitly with sámi customary rights in relation to nature conservation in the nordic countries and russia from a legal and historical perspective the authors investigate how longstanding sámi customary territorial rights have been reassessed in the context of new kinds of legislation regarding indigenous people they also look at the ideas behind the historical models of nature conservation the second part deals with the ideas and implementation of new kinds of postcolonial models of nature conservation the case of the sámi is compared with other indigenous people internationally with cases from australia new zealand canada and india the work investigates how the governance of protected areas has been influenced by the principles of equality and positive discrimination and how it has affected the possibilities of establishing adaptive co management arrangements for specific areas how the legal situation of indigenous peoples has been recognised in an international context is also investigated the volume provides a multidisciplinary analysis of how the customary livelihood of indigenous people has adapted to modern industrialised landscapes and also how postcolonial approaches have contributed to global changes of indigenous rights and nature conservation models
