this book undertakes a psychotropic analysis of texts that deal with the violence of drug trafficking and interdiction especially in mexico while most critics of so called narcoculture have either focused on an aesthetic sobriety in these works or discounted them altogether as exploitative and unworthy of serious attention drugs violence and latin america illuminates how such work may reflect and intervene in global networks of intoxication theorizing a dialectics of intoxication that illustrates how psychotropy may either solidify or destabilize the self and its relationship to the other it proposes that these tendencies influence human behavior in distinct ways and are leveraged for social control within both licit and illicit economies a consideration of a countercultural genealogy in latin america provides a contrastive psychotropic context for contemporary novels that

exposes links between narcoviolence and consumerism challenging our addictions of thought and feeling about ourselves and our relationships to drugs and narco violence

over the last few decades drug trafficking organizations in latin america became infamous for their shocking public crimes from narcoterrorist assaults on the colombian political system in the 1980s to the more recent wave of beheadings in mexico however while these highly visible forms of public violence dominate headlines they are neither the most common form of drug violence nor simply the result of brutality rather they stem from structural conditions that vary from country to country and from era to era in the politics of drug violence angelica dur n mart nez shows how variation in drug violence results from the complex relationship between state power and criminal competition drawing on remarkably extensive fieldwork this book compares five cities that have been home to major trafficking organizations for the past four decades cali and medell n in colombia and ciudad ju rez culiac n and tijuana in mexico she shows that violence escalates when trafficking organizations compete and the state security apparatus is fragmented however when the criminal market is monopolized and the state security apparatus cohesive violence tends to be more hidden and less frequent the size of drug profits does not determine violence levels and neither does the degree of state weakness rather the forms and scale of violent crime derive primarily from the interplay between marketplace competition and state cohesiveness an unprecedentedly rich empirical account of one of the worst problems of our era the book will reshape our understanding of the forces driving organized criminal violence in latin america and elsewhere

events like narcoterrorism in colombia in the 1980s or beheadings in mexico grab headlines easily yet drug traffickers also hide or minimize violence or engage in quiet wars the politics of drug violence explains variation in drug violence looking at the interactions between state power criminal competition and the forms of coercion criminals employ

this monograph is based on the papers and discussion from a technical review on drugs and violence held on sept 25 and 26 1989 in rockville md the review meeting was sponsored by the office of science and the division of epidemiology and prevention research national institute on drug abuse

more terrible than death is a gripping work that maps the dramatic new relationship between the united states and colombia in human terms using portraits of the colombians and americans involved the author's experiences in colombia as a writer and human rights investigator and an insider's analysis of the political realities that shape the expanding war on drugs and the growing u s military presence there looking at the war from the ground up interviewing and profiling human rights activists guerrillas and paramilitaries to explain how it has changed their lives robin kirk gives depth and meaning to the headlines that leave unexplained the intimate dimension of the u s colombian relationship

although challenges posed by various kinds of violent armed groups initially appear highly diverse and unrelated to one another in fact they all reflect the increasing connections between security and governance and in particular the relationship between poor governance and violent armed groups in many cases these groups are overtly challenging the state in others they are cooperating and colluding with state structures while subtly undermining them in yet others the state is a passive bystander while violent armed groups are fighting one another the mix is different the combinations vary and the perpetrators of violence have different motives methods and targets in spite of their divergent forms violent nonstate actors vnsas share certain qualities and characteristics these violent armed groups represent a common challenge to national and international security a challenge that is far greater than the sum of the individual groups and that is likely to grow rather than diminish over the next several decades this monograph focuses on the complex relationship between human security crime illicit economies and law enforcement it also seeks to disentangle the linkages between insurgency on the one hand and drug trafficking and organized crime on the other suggesting that criminal activities help sustain an insurgency but also carry certain risks for the insurgency
