the tiananmen square massacre one of the most significant events in modern chinese history was not a spontaneous eruption of violence but rather the culmination of years of political economic and social pressures that had been building within the country the roots of the protests trace back to a combination of rising discontent over economic reforms increasing corruption within the communist party and a growing desire for greater political freedoms while the tiananmen square protests are often remembered for the tragic and brutal crackdown it is important to understand the context that led up to the moment of violence in the early 1980s china was undergoing significant changes under the leadership of deng xiaoping the country began to shift away from the rigid centrally planned economy of the past toward a more market oriented model this shift known as reform and opening led to rapid economic growth but also deepened the inequalities within chinese society the urban working class farmers and intellectuals especially the youth began to feel the effects of inflation corruption and growing unemployment many felt that the promises of a more prosperous and equal society had not been fully realized and that those in power were benefitting disproportionately from the country s economic boom at the same time the political environment was becoming more open to reform the death of hu yaobang a former general secretary of the communist party in april 1989 served as a catalyst for the protests hu was seen by many as a champion of reform particularly among students and intellectuals who admired his calls for greater political freedom and anti corruption measures his death viewed by many as a result of the government s failure to address the issues he championed led to an outpouring of grief and outrage thousands

of students gathered in tiananmen square in beijing to mourn hu and demand political reforms what began as a mourning vigil quickly grew into a full fledged protest movement with demands for an end to corruption greater political freedoms and democratic reforms

examines the events and aftermath of the massacre by the chinese army of protestors in beijing s tiananmen square in 1989

the 1989 prodemocracy movement in the people s republic of china and the subsequent crackdown were marked by many dramatic reversals supported at first by several thousand beijing university students the movement quickly attracted millions of followers and developed into a nationwide mass movement the jubilant mood during the short lived freedom in tiananmen square turned into despair over the unnecessary bloodshed the event raised many deeply disturbing questions was the massacre necessary and justified what is the historical significance of this movement which path will the prc follow in the decade ahead although no one had anticipated the tragic outcome the popular unrest was not totally unexpected when i read the news of 200 000 beijing students and residents in open defiance of the government s order staging a largescale demonstration on april 20 i knew a confrontation between the people and the government was inevitable

describes events in beijing in may june 1989 and examines the reasons behind the students protest and the party s reaction

public protests are a vital tool for asserting grievances and creating temporary yet tangible communities as the world becomes more democratic and urban in the twenty first century while the political and social aspects of protest have been extensively studied little attention has been paid to the physical spaces in which protests happen yet place is a crucial aspect of protests influencing the dynamics and engagement patterns among participants in the design of protest tali hatuka offers the first extensive discussion of the act of protest as a design that is a planned event in a space whose physical geometry and symbolic meaning are used and appropriated by its organizers who aim to challenge socio spatial distance between political institutions and the people they should serve presenting case studies from around the world including tiananmen square in beijing the national mall in washington dc rabin square in tel aviv and the plaza de mayo in buenos aires hatuka identifies three major dimensions of public protests the process of planning the protest in a particular place the choice of spatial choreography of the event including the value and meaning of specific tactics and the challenges of performing contemporary protests in public space in a fragmented complex and conflicted world

numerous photographs detailed diagrams and plans complement the case studies which draw upon interviews with city officials urban planners and protesters themselves

many people think that the massacre at tiananmen square was a complete victory for the communists in charge of china but history proves that is not the case chan kai yee who suffered through the cultural revolution while mao zedong ruled china with an iron fist describes how elite intellectuals prepared to fight back his profound knowledge of history and close contacts with key dissenters give him an unmatched perspective on events which culminated with the protests in tiananmen square in 1989 thousands of people died in the tiananmen square massacre while the communist party ostensibly remained in power their leading members start to worry the massacre helped reformers overcome the resistance of stalwart conservatives who previously would not budge from their positions gradually talented intellectuals began to mount a silent peaceful coup d tat to seize control of the country with intellectuals running the country china became a dominant world power that could surpass the united states discover how a band of intellectuals transformed a nation and the world in tiananmen s tremendous achievements

the so called tiananmen square massacre is one of the most misleading events the us government and the western media have used to demonize the chinese government each and every year since 1989 there was ample silent evidence in the images produced by the western media that told the story of a highly restrained and caring chinese government facing a protest similar to those in the west at various stages of their economic development however the west and anti communist forces had capitalized on the situation in 1989 to fuel the public s anger intending to overthrow a good government how the western media lied about a massacre given the silent evidence that suggests otherwise and the moral implications of western powers making use of common pain and dissatisfaction within an economic cycle of a society to justify the overthrowing of governments across the globe are issues that this book is structured to explore

taking an interdisciplinary approach an introduction to global studies presents readers with a solid introduction to the complex interconnected forces and issues confronting today s globalized world introduces readers to major theories key terms concepts and notable theorists equips readers with the basic knowledge and

conceptual tools necessary for thinking critically about the complex issues facing the global community includes a variety of supplemental features to facilitate learning and enhance readers understanding of the material
