summary of the tipping point how little things can make a big difference a comprehensive summary part 1 tipping an idea the first chapter of the book starts by explaining the author s idea about how many companies function today as we may or may not know many companies are trying to sell as many of their products as possible that is why they are trying to tip those products those companies want to spread the word about their products and the want to spread it to as many people as possible but this is not an easy task the reason for that is that for something to tip there needs to be the right conditions for that to happen if the conditions are not favorable tipping will never occur here the author compares tipping a message to the spreading of a virus it is actually more or less the same a virus will never be able to spread out of a controlled environment unless there is an opportunity for it from all this gladwell comes up with three of his laws these laws describe the conditions necessary for tipping to occur and without them a virus will always stay inside these laws are the law of the few the stickiness factor the power of context without these three laws information will never be able to spread out to the intended group of people to be continued here is a preview of what you will get a full book summary an analysis fun quizzes quiz answers etc get a copy of this summary and learn about the book
