the turret fighter was predicted by many before world war ii to be the only effective way of dealing with the new threat of the heavy bomber in the event of the concept of a two man fighter with its armament concentrated in a power operated turret did not turn out to be the answer the Boulton Paul Defiant and the Blackburn Roc were only two examples of the concept to enter service and only the Defiant was able to claim any success in combat

through Patterson's remarkable photography and Nijboer's interviews with veterans Gunner allows readers to imagine what it must have been like to be an air gunner in the second world war 150 color photos plus historical b/w photos

8 1/2 x 11 1/8 b/w photo This title completes a trilogy covering the design and development of British fighters and bombers from the end of the biplane era to the present day. This new volume again emphasizes the designs that were never flown. It covers aircraft projects that were prepared from the mid 1930s onwards and that were influenced by the growing threat of another war with Germany through to some projects which appeared after the war was over. The latter includes early jets such as the Attacker, Sea Hawk and Venom which all flew post war but were designed to wartime or immediate post war requirements. Among the designs featured in this book are fixed gun fighters, turret fighters, twin engine cannon fighters, light, medium and heavy bombers, torpedo bombers and flying boats. As in the trilogy's first two volumes, these designs are covered with detailed descriptions and data and numerous photographs of models or artists' impressions showing how these designs would have looked. Unlike the post war years, details of many earlier unbuilt projects have been lost but fortunately information on a great number of these has survived and this will form the most complete record to be published on these fascinating machines.

text and photographs give instructions for assembling a variety of model airplanes

a comprehensive directory of the aircraft that saw service during world war ii with over 300 entries covering the fighters bombers aircraft transport built in some 15 nations around the world

this well researched and readable book tells the full story of these important aircraft
