this book examines theoretical and practical issues concerning the relationship between international law time and history problems relating to time and history are ever present in the work of international lawyers whether understood in terms of the role of historic practice in the doctrine of sources the application of the principle of inter temporal law in dispute settlement or in gaining a coherent insight into the role that was played by international law in past events but very little has been written about the various different ways in which international lawyers approach or understand the past and it is with a view to exploring the dynamics of that engagement that this book has been compiled in its broadest sense it is possible to identify at least three different ways in which the relationship between international law and its history may be conceived the first is that of a history of international law written in narrative form and mapped out in terms of a teleology of origins development progress or renewal the second is that of history in international law and of the role history plays in arguments about law itself for example in the construction of customary international law the third way of understanding that relationship is in terms of international law in history of understanding how international law has been engaged in the creation of a history that in some senses stands outside the history of international law itself the essays in this collection make clear that each type of engagement with history and international law interweaves various different types of historical narrative pointing to the typically multi layered nature of international lawyers engagement with the past and its importance in shaping the present and future of international law

international thought is the product of major political changes over the last few centuries especially the development of the modern state and the industrialisation of the world economy while the question of how to deal with strangers from other communities has been a constant throughout human history it is only in recent centuries that the question of foreign relations and especially imperialism and war have become a matter of urgency for all sectors of society throughout the world this book provides the first comprehensive overview of the evolution of western international thought and charts how this evolved into the predominantly anglophone field of international relations along the way several myths of the origins of international relations are explored and exposed the myth of the peace of westphalia the myths of versailles and the nature of the league of nations the realist idealist great debate myth and the myth of appeasement major approaches to the study of international affairs are discussed within their context and on their own terms rather than being shoe horned into anachronistic paradigms written in a clear and accessible style ashworth's analysis reveals how historical myths have been used as gatekeeping devices and how a critical re evaluation of the history of international thought can affect how we see international affairs today
