to mark the centenary of the wright brothers pioneering flights on 17 december 1903 the science museum will republish gibbs smith s classic introduction to their remarkable careers and their unique place in aviation history the wrights were arguably the first to make powered sustained and controlled flights near kitty hawk nc the aeroplane the first flyer was of their own design and construction and had been developed over a period of three years it was loaned to the science museum london from 1928 to 1948 and is now displayed in the national air and space museum smithsonian institution in washington dc a reproduction remaining in london this edition of gibbs smith s authoritative text first published in 1987 is illustrated with a number of historic photographs and detailed diagrams

the invention of flight craft heavier than air counts among humankind s defining achievements in this book aviation engineer and historian john d anderson jr offers a concise and engaging account of the technical developments that anticipated the wright brothers successful first flight on december 17 1903 while the accomplishments of the wrights have become legendary we do well to remember that they inherited a body of aerodynamics knowledge and flying machine technology how much did they draw upon this legacy did it prove useful or lead to dead ends leonardo da vinci first began to grasp the concepts of lift and drag which would be essential to the invention of powered flight he describes the many failed efforts of the so called tower jumpers from benedictine monk oliver of malmesbury in 1022 to the eighteenth century marquis de bacqueville he tells the fascinating story of aviation pioneers such as sir george cayley who in a stroke of genius first proposed the modern design of a fixed wing craft with a fuselage and horizontal and vertical tail surfaces in 1799 and william samuel henson a lace making engineer whose ambitious aerial steam carriage was patented in 1842 but never built anderson describes the groundbreaking nineteenth century laboratory experiments in fluid dynamics the building of the world s first wind tunnel in 1870 and the key contributions of various scientists and inventors in such areas as propulsion propellers not flapping wings and wing design curved not flat he also explains the crucial contributions to the science of aerodynamics by the german engineer otto lilienthal later praised by the wrights as their most im kitty hawk as they raced to become the first in flight anderson shows how the brothers succeeded where others failed by taking the best of early technology and building upon it using a carefully planned step by step

*experimental approach they recognized for example that it was necessary to become a skilled glider pilot before attempting powered flight with vintage photographs and informative diagrams to enhance the text inventing flight will interest anyone who has ever wondered what lies behind the miracle of flight undergraduates that would tell the connected prehistory of the airplane from caley to the wrights in light of the recognized excellence of his technical textbooks with their stimulating historical vignettes i can t think of a better person than professor anderson for the job he has the rare combination of technical and historical knowledge that is essential for the necessary balance inventing flight will be a welcome addition to undergraduate classrooms walter g vincenti stanford university*
