critically analyzes and revitalizes agrarian philosophy by tracing its evolution today most historians philosophers political theorists and scholars of rural america take a dim view of the agrarian ideal that farmers and farming occupy a special moral and political status in society agrarian rhetoric is generally seen as special pleading on the part of farmers seeking protection from labor reform and environmental regulation while continuing to receive direct payments and subsidies from the public till agrarianism should not be viewed as a set of immutable claims about farming and political order but as a tradition of moral and political philosophy that has evolved and deepened over the centuries agrarian naturalism the belief that culture and conduct are conditioned by nature because they are of a piece with nature becomes pragmatic
