Johns Hopkins Hospital South Africa. Dept. of Agriculture. Division of Veterinary Research*

a book for teachers and parents of adolescents it is colorful absorbing illuminating and critically practical each chapter draws on the perceptions and writings of teenage boys and girls and uses these to build a specific knowledge about what it means to be an adolescent at school what it means to be cool and normal and the effects of these social constructions on learning and relationships

winner of the 2005 Goethe Award in Psychoanalytic Scholarship the central argument of *On Being Normal and Other Disorders* is that psychic identity is acquired through one's primary intersubjective relationships thus the diagnosis of potential pathologies must also be founded on this relation given that the efficacy of all forms of treatment depends upon the therapeutic relation a diagnostic of this sort has wide ranging applications Paul Verhaeghe's critical evaluation of the contemporary DSM diagnostic shows that the lack of reference to an updated governing metapsychology impinges on the therapeutic value of the DSM categories in response to this problem the author sketches out the foundations of such a metapsychology by combining a Freud-Lacanian approach with contemporary empirical research close attention is paid to the processes of identity acquisition to show how the self and the other are not two separate entities rather subject formation is seen as a process in which both the subject's and the other's identity as well as the relationship between them comes into being by engaging this new theoretical approach in a constant dialogue with the findings of contemporary research this book provides a compass for the practical applications of such a differential diagnostic post modern categories of anxiety disorders personality disorders and post traumatic stress disorders are approached both through the well known neurotic psychotic and perverse structures as well as through the less familiar distinction between an actual pathology and a psychopathology these two outlooks which involve the role of language and the subject's relation to the other are spelled out to show their implications for treatment at every turn

online support groups are considered highly valuable in addition to traditional health care services but we know very little about how people actually join such a group this book offers a microanalysis of an online support group on eating disorders specifically the communication through textual messages between newcomers and regular members and members' nicknames the study uses an ethnomethodological and conversation analytical approach to show that members of online support groups treat the group as a community in which their illness identity is highly relevant it appears that members invoke community norms regarding legitimacy for newcomers newcomers are expected to admit that they are ill but this is a very difficult step for those who have not yet fully adopted the sick role Parsons 1951 in the field of eating disorders it is particularly difficult for people that tend to pro-ana i.e. the glamorization of eating disorders the insecurity and anxiety that newcomers display as they enter the online group could probably be relieved when a special entry subforum would be installed in which they can take time and space to actually recognize that they are ill

this book provides an up to date introduction to the study of generics and pursues the

enterprise of the influential generic book edited by gregory carlson and jeffrey pelletier which was published in 1995 genericity is a key notion in the study of human cognition as it reveals our capacity to organize our perceived reality into classes and to describe regularities the generic can be expressed at the level of a word or phrase ie the potato in the irish economy became dependent upon the potato or an entire sentence eg in john smokes a cigar after dinner the generic aspect is a property of the expression rather than any single word or phrase within it this book gathers new work from senior and young researchers to reconsider the notion of genericity examining the distinct contributions made by the determiner phrase eg the notions of kind individual and the verbal predicate eg the notions of permanency disposition ability habituality and plurality finally in connection with the whole sentence the analytic synthetic distinction is discussed as well as the notion of normality the book will appeal to both students and scholars in linguistics philosophy and cognitive science

while numerous advanced statistical approaches have recently been developed for quantitative trait loci qtl mapping the methods are scattered throughout the literature statistical methods for qtl mapping brings together many recent statistical techniques that address the data complexity of qtl mapping after introducing basic genetics topics and statistical principles the author discusses the principles of quantitative genetics general statistical issues of qtl mapping commonly used one dimensional qtl mapping approaches and multiple interval mapping methods he then explains how to use a feature selection approach to tackle a qtl mapping problem with dense markers the book also provides comprehensive coverage of bayesian models and mcmc algorithms and describes methods for multi trait qtl mapping and eqtl mapping including meta trait methods and multivariate sequential procedures this book emphasizes the modern statistical methodology for qtl mapping as well as the statistical issues that arise during this process it gives the necessary biological background for statisticians without training in genetics and likewise covers statistical thinking and principles for geneticists written primarily for geneticists and statisticians specializing in qtl mapping the book can also be used as a supplement in graduate courses or for self study by phd students working on qtl mapping projects

in this book durig presents a full blown theory of consciousness by engaging contemplation of the possibility of two brain hemispheres operating as two brains interacting with one another and aware of one another he claims that it is our brains existing in a system of interactive reflexivity sir perpetually aware of the world and each other s perception of the world which is the cause of consciousness he highlights the importance of social interaction for shaping consciousness into meaning mind self language and emotions as well as noting

weaknesses in the current paradigm

this book examines all aspects of narrative medicine and its value in ensuring that in an age of evidence based medicine defined by clinical trials numbers and probabilities clinical science is firmly embedded in the medical humanities in order to foster the understanding of clinical cases and the delivery of excellent patient care the medical humanities address what happens to us when we are affected by a disease and narrative medicine is an interdisciplinary approach that emphasizes the importance of patient narratives in bridging various divides including those between health care professionals and patients the book covers the genesis of the medical humanities and of narrative medicine and explores all aspects of their role in improving healthcare it describes how narrative medicine is therapeutic for the patient enhances the patient doctor relationship and allows the identification via patients stories of the feelings and experiences that are characteristic for each disease furthermore it explains how to use narrative medicine as a real scientific tool narrative medicine will be of value for all caregivers physicians nurses healthcare managers psychotherapists counselors and social workers maria giulia marini takes a unique and innovative approach to narrative medicine she sees it as offering a bridge indeed a variety of different bridges between clinical care and humanitas with a sensitive use of mythology literature and metaphor on the one hand and scientific studies on the other she shows how the guiding concept of narrative might bring together the fragmented parts of the medical enterprise john launer honorary consultant tavisstock clinic london uk
