the first major biography of the great actress draws on personal interviews with friends family and colleagues to offer a revealing study of kim stanley s extraordinary career and her acclaim as the finest stage actress of her generation as well as her turbulent self destructive personal life from her childhood and early training to her rise to stardom and the demons that destroyed her life

kim stanley robinson has been an ongoing force in the science fiction genre for over twenty years with his novels year s of rice and salt forty signs of rain crossing over to the mainstream and routinely appearing on the new york times best sellers list during the 80s and early nineties his short fiction continued to push the boundaries of science fiction defining the science focused side of the science fiction genre award winning editor jonathan strahan worked with kim stanley robinson to select the stories that make up this landmark volume in addition to these reprints the best of kim stanley robinson features a brand new short story the timpanist of the berlin philharmonic 1942

these essays examine robinson s use of alternate history and politics both in his many novels and in his short stories this collection drawn from writers on four continents includes five new essays and broadens the

interpretive debate surrounding robinson's science fiction and argues for consideration of the author as an intellectual figure of the first rank provided by publisher

masculinity in contemporary science fiction by men no plans for the future is the first comprehensive study of the self representation of men in sf novels published in the twenty first century by male authors exploring a broad selection of writers and works the fourteen chapters present a panoramic overview of men's contributions to current sf and explore their slow but noticeable progress in the representation of gender the impact of feminism and gender studies and the demands of readers have profoundly transformed men's sf which now presents far more caring and vulnerable male characters the old stereotypes are being replaced by a collective reflection on how men and masculinity are changing though the lack of a common agenda results in novels that while exciting and often challenging sometimes miss the chance to imagine a better anti patriarchal pro feminist future for men and for all human beings the authors analysed include robert charles wilson geoff ryman samuel r delany richard k morgan john scalzi iain m banks ernest cline james s a corey colson whitehead andy weir daniel h wilson ian mcdonald yoon ha lee tade thompson neal stephenson and kim stanley robinson

this book offers a comprehensive resource for anyone interested in understanding the complex interplay between language discourse and environmental issues

science in fiction geek novels lab lit whatever one calls them a new generation of science novels has opened a space in which the reading public can experience and think about the powers of science to illuminate nature as well as to generate and mitigate social change and risks under the literary microscope examines the implications of the discourse taking place in and around this creative space exploring works by authors as disparate as barbara kingsolver richard powers ian mcewan ann patchett margaret atwood and michael crichton these essays address the economization of scientific institutions ethics risk and gender disparity in scientific work the reshaping of old stereotypes of scientists science in an evolving sci fi genre and reader reception and potential contributions of the novels to public understandings of science under the literary microscope illuminates the new ways in which fiction has been grappling with scientific issues from climate change and pandemics to artificial intelligence and genomics and makes a valuable addition to both contemporary literature and science studies courses in addition to the editors the contributors include anna auguscik jay clayton carol colatrella sonja fückler raymond haynes luz maría hernández nieto emanuel herold karin hoepker anton kirchhofer antje kley natalie roxburgh uwe schimank sherryl vint and peter weingart

a major new novel from one of science fiction's most powerful voices aurora tells the incredible story of our first voyage beyond the solar system brilliantly imagined and beautifully told it is the work of a writer at the height of his powers our voyage from earth began generations ago now we approach our new home aurora

essays on speculative science fiction explore the futures that feed our most cherished fantasies and terrifying nightmares while helping diverse communities devise new survival strategies for a tough millennium the explosion in speculative science fiction sf across different media from the late twentieth century to the present

has compelled those in the field of sf studies to rethink the community's identity orientation and stakes in this edited collection more than forty writers critics game designers scholars and activists explore core sf texts with an eye toward a future in which corporations dominate both the means of production and the means of distribution and governments rely on powerful surveillance and carceral technologies the essays international in scope demonstrate the diversity of sf through a balance of popular mass market novels comics films games tv shows creepypastas and more niche works sf works explored range from riot baby by tochi onyebuchi 2084 the end of the world by boualem sansal terra nullius by claire coleman watchmen and x men comics and the marvel film captain america the winter soldier to the maddaddam trilogy by margaret atwood the dispossessed by ursula k le guin the wandering earth by liu cixin and the wormwood trilogy by tade thompson in an era in which ecological disaster and global pandemics regularly expose and intensify deep political economic inequalities what futures has sf anticipated what survival strategies has it provided us can it help us to deal with and grow beyond the inequalities and injustices of our times unlike other books of speculative science fiction criticism uneven futures uses a think piece format to make its critical insights engaging to a wide audience the essays inspire visions of better possible futures drawing on feminist queer and global speculative engagements with indigenous latinx and afro and african futurisms while imparting important lessons for political organizing in the present contributors ben abraham emmet asher perrin brent ryan bellamy gerry canavan andrew ferguson fabio fernandes dexter gabriel m elizabeth ginway sean guynes ouissal harize david m higgins veronica hollinger allanah hunt nicola hunte nathaniel isaacson ayana jamieson darshana jayemanne gwyneth jones brendan keogh sami ahmad khan cameron kunzelman bryan kamaoli kuwada isiah lavender iii caryn lesuma karen lord sarah marrrs farah mendlesohn cathryn merla watson hugh charles o connell b pladek john rieder lysa rivera kim stanley robinson steven shaviro rebekah sheldon alison sperling alfredo suppia bogi takács taryne jade taylor sherryl vint kirin wachter grene ida yoshinaga

a sublime and radically original exploration of the sierra nevadas the best mountains on earth for hiking and camping from new york times bestselling novelist kim stanley robinson bill mckibben gary snyder kim stanley robinson first ventured into the sierra nevada mountains during the summer of 1973 he returned from that encounter a changed man awed by a landscape that made him feel as if he were simultaneously strolling through an art museum and scrambling on a jungle gym like an energized child he has returned to the mountains throughout his life more than a hundred trips and has gathered a vast store of knowledge about them the high sierra is his lavish celebration of this exceptional place and an exploration of what makes this span of mountains one of the most compelling places on earth over the course of a vivid and dramatic narrative robinson describes the geological forces that shaped the sierras and the history of its exploration going back to the indigenous peoples who made it home and whose traces can still be found today he celebrates the people whose ideas and actions protected the high sierra for future generations he describes uniquely beautiful hikes and the trails to be avoided robinson's own life altering events defining relationships and unforgettable adventures form the narrative's spine and he illuminates the human communion with the wild and with the sublime including the personal growth that only seems to come from time spent outdoors the high sierra is a gorgeous absorbing immersion in a place born out of a desire to understand and share one of the greatest rapture inducing

experiences our planet offers packed with maps gear advice more than 100 breathtaking photos and much more it will inspire veteran hikers casual walkers and travel readers to prepare for a magnificent adventure

award winning epics like the mars trilogy and groundbreaking alternative histories like the days of rice and salt have brought kim stanley robinson to the forefront of contemporary science fiction mixing subject matter from a dizzying number of fields with his own complex ecological and philosophical concerns robinson explores how humanity might pursue utopian social action as a strategy for its own survival robert markley examines the works of an author engaged with the fundamental question of how we as individuals as a civilization and as a species might go forward by building stories on huge time scales robinson lays out the scientific and human processes that fuel humanity's struggle toward a more just and environmentally stable world or system of worlds his works invite readers to contemplate how to achieve and live in these numerous possible futures they also challenge us to see that sf's literary cultural and philosophical significance have made it the preeminent literary genre for examining where we stand today in human and planetary history

set in our nation's capital here is a chillingly realistic tale of people caught in the collision of science technology and the consequences of global warming when the storm got bad frank vanderwal was in his office at the national science foundation when it was over large chunks of san diego had eroded into the sea and d c was underwater everything frank and his colleagues feared had culminated in this disaster and now the world was looking to them to fix it but even as d c bails itself out a more extreme climate change looms the melting polar ice caps are shutting down the warm gulf stream waters meaning ice age conditions could return and the last time that happened eleven thousand years ago it took just three years to start

by the time phil chase is elected president the world's climate is far on its way to irreversible change food scarcity housing shortages diminishing medical care and vanishing species are just some of the consequences the erratic winter the washington d c area is experiencing is another grim reminder of a global weather pattern gone haywire bone chilling cold one day balmy weather the next but the president elect remains optimistic and doesn't intend to give up without a fight a maverick in every sense of the word chase starts organizing the most ambitious plan to save the world from disaster since fdr and assembling a team of top scientists and advisers to implement it for charlie quibler this means reentering the political fray full time and giving up full time care of his young son joe for frank vanderwal hampered by a brain injury it means trying to protect the woman he loves from a vengeful ex and a rogue black ops agency not even the president can control a task for which neither frank's work at the national science foundation nor his study of tibetan buddhism can prepare him in a world where time is running out as quickly as its natural resources where surveillance is almost total and freedom nearly nonexistent the forecast for the chase administration looks darker each passing day for as the last and most terrible of natural disasters looms on the horizon it will take a miracle to stop the clock the kind of miracle that only dedicated men and women can bring about

new york times bestselling author kim stanley robinson returns with a bold and brilliant vision of new york city

in the next century as the sea levels rose every street became a canal every skyscraper an island for the residents of one apartment building in madison square however new york in the year 2140 is far from a drowned city there is the market trader who finds opportunities where others find trouble there is the detective whose work will never disappear along with the lawyers of course there is the internet star beloved by millions for her airship adventures and the building s manager quietly respected for his attention to detail then there are two boys who don t live there but have no other home and who are more important to its future than anyone might imagine lastly there are the coders temporary residents on the roof whose disappearance triggers a sequence of events that threatens the existence of all and even the long hidden foundations on which the city rests

for students scholars readers advisors and curious sf readers and fans this guide provides an easy to use launch pad for researching and learning more about science fiction writers and their work emphasizing the best popular and contemporary authors this book covers 100 sf writers providing for each a brief biographical sketch including a quote from the author awards etc a list of the author s major works including editions and other writings research sources biographies criticism research guides and web sites in addition you ll find read alike lists for selected authors for anyone wanting to find information on popular sf authors this should be the first stop

kim stanley robinson s mars trilogy is one of science fiction s most honored stories with red mars winning the distinguished nebula award and both green mars and blue mars honored with the hugo now robinson returns to the realm he has made his own the planet mars in a brilliantly imagined drama with a searing poetic vision from a training mission in antarctica to blistering sandstorms sweeping through labyrinths of barren canyons the interwoven stories of the martians set in motion a sprawling cast of characters upon the surface of mars as the planet is transformed from an unexplored and forbidding terrain to a troubled image of a re created earth we meet the first hundred explorers men and women who are bound together by earth s tenuous toehold on mars presenting unforgettable stories of hope and disappointment of fierce physical and psychological struggles the martians is an epic chronicle of a planet that represents one of humanity s most glorious possibilities praise for the martians a uniquely rewarding experience of state of the art science fiction the new york times book review no one familiar with robinson s trilogy can read through these final valedictory stories without feeling moved the washington post the stories are beautifully written the characters are well developed and the author s passion for ecology manifests itself on every page publishers weekly starred review

red moon is a magnificent novel of space exploration and political revolution from new york times bestselling author kim stanley robinson it is thirty years from now and we have colonized the moon american fred fredericks is making his first trip his purpose to install a communications system for china s lunar science foundation but hours after his arrival he witnesses a murder and is forced into hiding it is also the first visit for celebrity travel reporter ta shu he has contacts and influence but he too will find that the moon can be a perilous place for any traveler finally there is chan qi she is the daughter of the minister of finance and without doubt a person of interest to those in power she is on the moon for reasons of her own but when she attempts to return

to china in secret the events that unfold will change everything on the moon and on earth

an early novel from science fiction legend kim stanley robinson the memory of whiteness is now available for the first time in decades in 3229 a d human civilization is scattered among the planets moons and asteroids of the solar system billions of lives depend on the technology derived from the breakthroughs of the greatest physicist of the age arthur holywelkin but in the last years of his life holywelkin devoted himself to building a strange beautiful and complex musical instrument that he called the orchestra johannes wright has earned the honor of becoming the ninth master of holywelkin s orchestra follow him on his grand tour of the solar system as he journeys down the gravity well toward the sun impelled by a destiny he can scarcely understand and is pursued by mysterious foes who will tell him anything except the reason for their enmity at the publisher s request this title is being sold without digital rights management software drm applied

abbott offers a fruitful new way to read science fiction one that also greatly enriches our understanding of western history and its impact on our collective imagination detailing the overlap of science fiction and western fiction especially relating to their mutual interest in and concerns about frontier expansionism he reveals an unsuspected common ground that informs the writings of both camps reviewing the work of many hugo and nebula award winners as well as drawing upon popular film and television series like the buck rogers serials abbott s study journeys across the far reaches of science fiction s universe
