dentistry is not only about understanding the causes of oral disease and having the technical expertise to treat them patients frequently challenge practitioners with ethical dilemmas psychological and social problems health and welfare difficulties and personal demands this book covers the case histories of six individuals and the dental problems they encounter through their lives each case is loosely based on a real individual to allow the senior dentistry student to develop an understanding of the many issues they may face in daily clinical practice although all the patients featured in the book have problems related to oral and dental diseases their successful long term management requires both a profound awareness of modern treatment options and a broad knowledge of law applied to dentistry the ethics of dental care plus the psychology and sociology of disease and health related behaviour each chapter describes a hypothetical patient and how he or she presented or might present to a general dental practitioner the various treatment options which could be chosen by the patient s practitioner are included and the advantages and disadvantages of the various treatment plans are described the medium and long term outcomes for that patient in terms of their oral well being are then covered so that the reader can appreciate how even seemingly inconsequential treatment decisions can impact on a person many years after their encounter with the

dentist this longitudinal approach will help the reader to view dealing with patients problems as a lifetime's work rather than as a set of one off interventions

the addiction treatment planner third edition provides all the elements necessary to quickly and easily develop formal treatment plans that satisfy the demands of hmos managed care companies third party payors and state and federal review agencies this third edition includes new language forevidence based care that fits mandates set forth by the american society of addiction medicine asam which are being adopted by most state accrediting bodies new chapters cover chronic pain dangerousness lethality opioid dependence and self care saves you hours of time consuming paperwork yet offers the freedom to develop customized treatment plans organized around 42 main presenting problems including chemical and nonchemical addictions such as substance abuse eating disorders schizoid traits and others over 1 000 well crafted clear statements describe the behavioral manifestations of each relational problem long term goals short term objectives and clinically tested treatment options easy to use reference format helps locate treatment plan components by behavioral problem or dsm iv tr diagnosis includes a sample treatment plan that conforms to the requirements of most third party payors and accrediting agencies including hcfa jcaho and ncqa
