the evolution of technologies has greatly changed the basic structure of our industry and nature of our daily lives  
industries which did not exist several decades ago have made remarkable progress in recent years and  
ourished one of the most typical examples is the computer game industry  
this book presents a sample of the most recent research concerning the application of computational intelligence techniques and internet technology in computer games  
this book contains eight chapters  
the rst chapter by n baba and h handa is on utilization of evolutionary algorithms to increase excitement of the commons game  
it is shown that the original commons game which is one of the most popular environmental games has been made much more exciting by the intelligent utilization of the two evolutionary algorithms  
the second chapter by h barber and d kudenko is on adaptive g eration of dilemma based interactive narratives  
in this chapter they present an interactive narrative generator that can create story lines that incorporate dilemmas to add dramatic tension  
they also brie y touch upon the pos bility that their work could provide a useful tool for making dramatically interesting game playing possible  
the third chapter by j tongelius s m lucas and r d nardi is on computational intelligence ci in racing games  
the authors suggest that ci techniques can be used for various purposes such as controller evolution for the racing and track evolution for a pro cient player

why did i write this book  
i m still not sure  
after all i m a researcher  
which means i think i know how to write

technical papers but writing for a n technical audience is something i know nothing about it took a lot of effort before i could force myself to sit down to write the first word once i did however it was hard not to stop when i started this project i didn t know that i had a lot to say and in some sense the results show this the book is much longer than i even imagined it would be worse yet is that there is a lot of material that i decided not to include it s a good thing that the publishers decided to limit how long the book could be however after much soul searching i think i now know the reasons why i wrote this book first and foremost this book tells an interesting story it s about the life of a checkers playing computer program chinook from its creation in 1989 to its retirement in 1996 in reality the story revolves around two people with different views of the program as the creator of chinook i wanted to push the program to become the best player in the world in much the same way that a father might encourage his son to excel at sports
