the study of european archaeology dates back to the 19th century but the number of archaeologists projects and publications has increased greatly during the last three decades with the collapse of the soviet union and the restructuring of several countries archaeology in europe has more opportunity for interaction and research than previously was possible this comprehensive volume covers the prehistoric period in europe from the earliest appearance of humans to the rise of the roman empire and includes the paleolithic mesolithic bronze and iron ages throughout these periods the major developments and explored using the archaeological data including technology trade settlement warfare ritual using methodologies and theories that were previously unknown in europe decades ago new discoveries and arguments are included in the research as well as reevaluations of previous discoveries this work also includes a present geographical summary and how it impacts the current archaeological discoveries and research being conducted european prehistory a survey includes many comprehensive maps and site photos it will be a vital resource to prehistoric archaeologists anthropologists and historians in and outside of europe

this book straddles the disciplines of archaeology and social anthropology its 25 contributions divided into 6 sections with separate

introductions successively scrutinise the concept of war in philosophy social theory and the history of anthropological and archaeological research discuss warfare in pre state and state societies and assess its relationship to rituals social identification and material culture

social orders and social landscapes marks a new direction in research for eurasian archaeology that focuses on how people lived in their local environment and interacted with their near and distant neighbours rather than on overarching comparisons of archaeological culture complexes stemming from the 2005 university of chicago eurasian archaeology conference the papers collected here reflect this new research agenda though the way in which each author addressed the theme of the conference and thus the book was strikingly varied this diversity arises out of the field s intellectual flux driven by the principled engagement of the rich analytical traditions of the soviet cis anglo american and european schools despite the variability in approaches and subject matter several key themes emerged 1 the reinterpretation culture categories by examining particular aspects of social life 2 the role social memory plays in the production of landscape and place 3 the influence of the built environment on societies and 4 the ways in which economic considerations affect social orders and landscapes the result is a book that helps to re image eurasia as a complex landscape fragmented by historically contingent and shifting ecological and social boundaries rather than a bounded mosaic of culture areas or environmental zones scholarly research on eurasia was transformed by the collapse of the soviet union in 1991 entire areas and fields of research became accessible to european and american scholars for the first time resulting in the emergence of new centers specializing in primary field investigations throughout the vast politically transformed landmass of eurasia one such center is the university of chicago that has recently sponsored two large international conferences on eurasian archaeology social orders and social landscapes is the product of the second chicago conference

held in spring 2005 the editors of the volume should be proud of their efforts that have resulted in such a broad ranging and prompt publication the articles encompass a variety of disciplinary perspectives including archaeology history art history palynology and zooarchaeology extend chronologically from neolithic and bronze age times to the formation of national identity in turkey in the early 20th century and range geographically from europe to china several articles reconstruct basic subsistence activities others analyze distinctive settlement types and political and cultural frontiers including the assimilation and emergence of new self defined ethnic groups and the selective adoption of new systems of religious belief what unites this diverse collection is their consistent emphasis on the social construction of reality and the production of social landscapes and memories that altered perceptions of the physical world and mediated the practical activities that here have been convincingly reconstructed from the archaeological record in so doing rigid stereotypes are questioned and novel interpretations persuasively advanced early bronze age pastoralism on the south russian steppes did not consist exclusively of herding animals nor was it combined as it was later in the iron age with the pursuit of agriculture rather d anthony and d brown suggest that at least in the samara river valley the herding of animals occurred along side the intensive gathering of wild nutritionally rich plants the kalas of ancient chorasmia are not cities nor even proto urban formations but rather are large heavily fortified enclosures meant to repel attacks of armed nomadic cavalry they represent a continuation of a distinct central asian settlement pattern that began in the bronze age and that formed the center of a landscape divided into contiguous self contained oases the mongols not only herded livestock but also farmed fished hunted and traded throughout the vast area that they had conquered uniting most of eurasia into a single economically integrated system new perspectives proliferate throughout this richly detailed and extremely broad ranging collected volume phil kohl professor of anthropology and the kathryn w davis professor of slavic studies at wellesley college social

orders and social landscapes is a stimulating addition to the still small literature in english making the rich datasets from the archaeology of eurasia widely accessible to western scholars the authors of the eighteen chapters analyze data from china to the mediterranean from the fourth millennium bce through the fourteenth century ce with the tools of art and architectural history text analysis paleobotany and paleozoology and anthropological theory among others the product of a conference at the university of chicago this book fulfils the goal of the graduate student organizers to apply interdisciplinary approaches to understanding the archaeology and history of the eurasian landmass in local terms through a focus on how people lived in their local environments in the decade and a half since the end of the soviet union scholarly communication has broadened and the mutual influences have stimulated many new and thought provoking views on the eurasian past this book is an exemplary product of the new scholarly discourse karen s rubinson research scholar department of anthropology barnard college columbia university

eastern europe in this book embraces the area formally referred to as the marchlands of europe sometimes as eastern central europe and which included when this book was originally published in 1971 yugoslavia bulgaria rumania hungary czechoslovakia east germany and poland this book presented for the first time the archaeological material related to the prehistory of central and west europe describing the evidence for the earlier prehistory settlement patterns means of subsistence and material culture in the various natural environments of this area it looks at the baltic coast the north and east european plains the carpathian mountain ring the danube basin and the adriatic and black sea coasts the evidence for late mesolithic hunting fishing groups is examined their techniques and their reaction to the introduction and spread of agriculturalists as well as the development and activities of both food gatherers and food producers until the early use and manufacture of metal objects 3000 years of prehistory are covered in a way which is designed to be intelligible and useful

to all those who are interested in prehistory and in eastern europe

includes section reviews

the eneolithic period in bulgaria which covers the 5th millennium b c is a remarkable span of time in her prehistory for a very long time the idea of a rudimentary primitive mode of life and culture of the population which inhabited the bulgarian lands in that very distant epoch largely dominated the public mind

reimagining regional analysis explores the interplay between different methodological and theoretical approaches to regional analysis in archaeology the past decades have seen significant advances in methods and instrumental techniques including geographic information systems the new availability of aerial and satellite images and greater emphasis on non traditional data such as pollen soil chemistry and botanical remains at the same time there are new insights into human impacts on ancient environments and increased recognition of the importance of micro scale changes in human society these factors combine to compel a reimagining of regional archaeology the authors in this volume focus on understanding individual trajectories and the historically contingent relationships between the social the economic the political and the sacred as reflected regionally among topics considered are the social construction of landscape use of spatial patterning to interpret social variability paleoenvironmental reconstruction and human impacts and social memory and social practice this book opens a discourse around the spatial patterning of the contingent recursive relationships between people their social activities and the environment

the first edition of this standard introduction was published in 1976 and reprinted in 1979 this new volume is a second edition completed before the author's death last year the main changes are in the chapters describing the early development of metallurgy in which there has been so much recent research the later post roman chapters have been revised to take account of new discoveries from excavations the volume is extensively illustrated as before and is now issued in a hard cover

this book is a wide ranging archaeological description and analysis of infancy the social constructions of infancy and the practices of infant care and social reproduction through time and across space the main themes are the ways in which infants have lived in and have been perceived by society the burial of the infant dead and the meanings of domestic infanticide and infant sacrifice it examines infancy as a process with meanings varying between and within societies and it addresses the relationships between infants and adults the contradictions which lie at the heart of attitudes to infants and the exclusion of neonates from communal life and communal burial are recurrent themes the whole is rounded off with a concluding chapter which aims to establish some general statements about past attitudes to infancy and the treatment of infants whilst stressing the particularity and specificity of the various historical contexts which have been examined

the research presented in this study focuses upon a 2 000 sq km area in the Körös river valley in northern Békés county eastern Hungary within this region the author analyzes two separate lines of evidence that relate to the changing patterns of social interaction and integration during the late neolithic and early copper age periods chapter 1 details the scope of the project chapter 2 develops the theoretical framework chapter three discusses the methodological correlates of this theoretical framework and addresses the

archaeological problem of inferring dynamic social systems from static material remains the middle range theory and bridging arguments are presented and the problems of measuring social interaction and integration in prehistoric contexts are discussed chapter four presents the archaeological background necessary for understanding the radical social changes that occurred on the great hungarian plain ca 4 500 bc chapter five presents the specific research design chapter six provides an overview of the study area and presents the sites and assemblage included in the subsequent analyses chapter seven details the analysis of integration throughout the study area based upon the spatial data and chapter eight lays out the analyses of early copper age interaction based upon the stylistic data from the early copper age ceramic assemblages chapter nine integrates the analyses presented in chapters seven and eight into a coherent model and attempts to place the study area into the wider temporal and geographic context of the great hungarian plain and into the wider context of anthropological archaeology
