this book is a statement of my views on a number of problems in literary theory and  
contemporary criticism but it is also as any theoretical study must be a progress report a  
record of inquiry that has not yet concluded in a sense a book on theory cannot really end at a  
certain point work on it ceases even though one continues to think critically and skeptically

about the problems and the solutions that the book contains preface p xi

this collection of essays on the nature of art critics authority and responsibilities addresses questions such as whether some art is beyond criticism and how critics can bridge the gap between the art community and the general public

institutional critique is best known through the critical practice that developed in the late 1960s and early 1970s by artists who presented radical challenges to the museum and gallery system since then it has been pushed in new directions by new generations of artists registering and responding to the global transformations of contemporary life the essays collected in this volume explore this legacy and develop the models of institutional critique in ways that go well beyond the field of art interrogating the shifting relations between institutions and critique the contributors to this volume analyze the past and present of institutional critique and propose lines of future development engaging with the work of philosophers and political theorists such as michel foucault judith butler gilles deleuze antonio negri paolo virno and others these essays reflect on the mutual enrichments between critical art practices and social movements and elaborate the conditions for politicized critical practice in the twenty first century

the etymological affinity between criticism and crisis has never been more resonant than it is today when social life is increasingly understood as defined by a succession of overlapping global crises financial and economic crises environmental crises geopolitical crises terrorist crises public health crises but what is the role of literary and cultural criticism in conceptualizing this atmosphere of perpetual crisis if as paul de man maintained criticism necessarily exists in a state of crisis in what ways is this condition intensified at a time when the social formations within which criticism operates and the cultural artefacts that it takes as its objects are themselves pervaded by actual and imagined states of emergency this book the first sustained response to these questions demonstrates the capacity of critical thought working in dialogue with key narrative texts to provide penetrating insights into a contemporary landscape of global manufactured risk written by an international team of specialist scholars the essays in the collection draw on a wide variety of contemporary theoretical fictional and cinematic sources ranging from giorgio agamben jacques derrida and fredric jameson to cormac mccarthy ian mcewan and lauren beukes to ghost and the james bond and national treasure series appearing in the midst of a phase of extraordinary turbulence in the fabric of

this book provides an analysis of strategic behavior in international crises a new approach is used to narrow the gap between psychological and game theoretical studies of crisis includes an in depth case study of the 1967 middle east crisis

the word crisis denotes a break a discontinuity a rupture a moment after which the normal order can continue no longer yet our political vocabulary today is suffused with the rhetoric of crisis to the point that supposed abnormalities have been normalized how can the notion of crisis be rethought in order to take stock of and challenge our understanding of the many predicaments in which we find ourselves instead of diagnosing emergencies didier fassin axel honneth and an assembly of leading thinkers examine how people experience interpret and contribute to the making of and the response to critical situations contributors inquire into the social production of crisis evaluating a wide range of cases on five continents through the lenses of philosophy sociology anthropology political science history and economics considering social movements intellectual engagements affected communities and reflexive perspectives the book foregrounds the perspectives of those most closely involved bringing out the immediacy of crisis featuring analysis from below as well as above from the inside as well as the outside crisis under critique is a singular intervention that utterly recasts one of today's most crucial yet most ambiguous concepts

critique and crisis established reinhart koselleck's reputation as the most important german intellectual historian of the postwar period this first english translation of koselleck's *tour de force* demonstrates a chronological breadth a philosophical depth and an originality which are hardly equalled in any scholarly domain it is a history of the enlightenment in miniature fundamental to our understanding of that period and its consequences like *tocqueville* koselleck views enlightenment intellectuals as an uprooted unrealistic group of onlookers who sowed the seeds of the modern political tensions that first flowered in the french revolution he argues that it was the split that developed between state and society during the enlightenment that fostered the emergence of this intellectual elite divorced from the realities of politics

koselleck describes how this disjunction between political authority proper and its subjects led to private spheres that later became centers of moral authority and eventually models for political society that took little or no notice of the constraints under which politicians must inevitably work in this way progressive bourgeois philosophy which seemed to offer the promise of a unified and peaceful world in fact produced just the opposite the book provides a wealth of examples drawn from all of europe to illustrate the still relevant message that we evade the constraints and the necessities of the political realm at our own risk critique and crisis is included in the series studies in contemporary german social thought edited by thomas mccarthy
