inspiring deep emotion landscape carries many meanings this book follows the development of several threads of the concept of landscape as they have evolved across disciplines and across countries leading to the european landscape convention and the designation of cultural landscapes as world heritage sites the book introduces the key notions of landscape such as landscape as meaning as picture as scale as scenery and as place it also considers the various factors which influence the way in which landscape is perceived now and in the past with all of the senses finally it looks of the various ways of protecting managing and enhancing the landscape taking into account a future of climate change beautifully illustrated and including capsules in each section which provide fascinating insights into subjects from reading pictures to mapping and gis through a discussion of the range of types of landscape to issues such as eco museums this book provides an excellent introductory overview for any students with an interest in the landscape around us

this major new text provides an introduction to the interaction of culture and society with the landscape and environment it offers a broad based view of this theme by drawing upon the varied traditions of landscape interpretation from the traditional cultural geography of scholars such as carl sauer to the new cultural geography which has emerged in the 1990s the book comprises three major interwoven strands first fundamental factors such as environmental change and population pressure are addressed in order to sketch the contextual variables of landscapes production second the evolution of the humanised landscape is discussed in terms of processes such as clearing wood the impact of agriculture the creation of urban industrial complexes and is also treated in historical periods such as the pre industrial the modern and the post modern from this we can see the cultural and economic signatures of human societies at different times and places finally examples of landscape types are selected in order to illustrate the ways in which landscape both represents and participates in social change the authors use a wide range of source material ranging from place names and pollen diagrams to literature and heritage monuments superbly illustrated throughout it is essential reading for first year undergraduates studying historical geography human geography cultural geography or landscape history

outstanding explorations of design concepts principles and processes this second edition

of introduction to landscape design offers even broader coverage of the environmental human technological and aesthetic issues associated with landscape design than the first edition beginning with the way we perceive manage and design the landscape it moves on to explore the forces that influence land design an overview of landscape management planning and design includes a discussion of the roles and integration of the professions involved modes of professional practice and site scale design processes the book explores the ecology of design and the integration of land design decisions into dynamic systems this fully updated new edition presents landscape design as a synergism of art and science addresses the interplay between buildings and sites provides insights into the breadth of people environment relationships places special emphasis on our growing understanding of interrelationships between the landscape and human decisions a superb introduction for students as well as a useful reference for practicing professionals this book is an excellent guide for anyone who wants to develop a better understanding of landscape design

aimed at prospective and new students this book gives a comprehensive introduction to the nature and practice of landscape architecture the professional skills required and the latest developments after discussing the history of the profession the book explains the design process through principles such as hierarchy human scale unity harmony asymmetry colour form and texture it looks at how design is represented through both drawing and modelling and through digital techniques such as cad and the use of gis geographic information systems this is followed by an examination of project management and landscape management techniques finally the book explores educational and employment opportunities and the future of the profession in the context of climate change and sustainability illustrated with international examples of completed projects landscape architecture provides an invaluable one stop resource for anyone considering studying or a career in this field

introducing human geographies is a comprehensive stimulating and innovative introduction to human geography this second edition has been thoroughly revised and updated to build upon the success of the acclaimed first edition now in full colour and with sixteen new chapters discussion points and glossary definitions in the margin it is even more accessible part one discusses the principal ideas through which human geographers understand and shape their subject part two examines each of the main sub fields cultural geography development geography economic geography environmental

geography historical geography political geography rural geography social geography urban geography part three demonstrates how different thematic interests are combined in cutting edge human geographical debates introducing human geographies continues to be the essential textbook for first year undergraduate geography students taking introductory courses in human geography

for introductory courses in human geography or cultural geography this mid edition revision of the seventh edition of the cultural landscape has been revised to incorporate the september 11th attack on the united states the text has an established track record as the leader in the field due to its sound pedagogy timeliness and readability it is widely adopted and praised because it is clearly written and organized up to date and approaches topics in ways that appeal to the majority of introductory human geography instructors and students new new contemporary geographic tools box in chapter 1 called aftermath of terror reflects contributions of geographic tools to world trade center rescue new new heading in chapter 6 called taliban vs western values discusses islam in context of extremist positions keeps students current on the latest information in this ever changing world new new key issue in chapter 8 called why has terrorism increased new complete reworking of chapter 1 the chapter is now entitled thinking like a geographer eases student comprehension by organizing the chapter around five basic themes exceptionally clear organizat

what were the landscapes of the past like what will landscapes look like in the future landscapes are all around us but most of us know very little about how they have developed what goes on in them and how they react to changing climates tectonics and human activities examining what landscape is and how we use a range of ideas and techniques to study it andrew goudie and heather viles demonstrate how geomorphologists have built on classic methods pioneered by some great 19th century scientists to examine our earth using examples from around the world including new zealand the tibetan plateau and the deserts of the middle east they examine some of the key controls on landscape today such as tectonics and climate as well as humans and the living world they also discuss some key landscape detectives from the past including charles darwin who did some important but often overlooked research on landscape concluding with the cultural importance of landscape and exploring how this has led to the conservation of much earth heritage they delve into the future and look at how we can predict the response of landscapes to climate change in the future about the series

the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

how do you design a landscape book suitable for its intended uses how can the natural qualities of a landscape be enhanced with new features and focal points how can you make pedestrians stay on the footpath what kind of plant path or wall should you put where and what sort of contract should you choose for your client s contractor this refreshing down to earth book answers these questions guiding new students through the many facets of professional practice and welding together the artistic legal financial environmental and management issues which can seem so dauntingly disconnected illustrated with original drawings photographs sample plans and facsimiles including a new colour plate section this readable classic has been fully revised and updated throughout

landscape architecture plays an important role in shaping the places in which we live and work but what is it landscape architects are involved amongst other things in the layout of business parks the reclamation of derelict industrial sites the restoration of historic city parks and the siting and design of major pieces of infrastructure such as motorways dams power stations and flood defences as well as the planning of parks and gardens taking a historical perspective ian thompson looks at both the roots of landscape architecture and the people that established it this very short introduction explores some of the misconceptions about landscape architecture and considers the discipline s origins in landscape gardening thompson takes a look at a number of areas including the influence of modernism the difference between landscape design and landscape planning and the way that planning legislation has driven the growth of the discipline he also explores contemporary environmentalism the debate as to whether landscape architecture is an art or a science landscape architecture in the community post industrial projects and its relationship with ecological urbanism about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

winner current archaeology 2023 book of the year 2023 this volume brings together several years of work devoted to the wider landscape of the heart of neolithic orkney world heritage site it documents the results of a program of geophysical and related survey across an area of c 285 hectares between skara brae on the west orkney coast and maeshowe by the loch of stenness the project has made it possible to talk for the first time about the landscape context of some of the most remarkable and renowned prehistoric monuments in western europe the aims are to synthesize the data from different forms of survey and to document the changing character and development of this landscape over time the results are genuinely remarkable are presented in a manner which makes the material of interest and value to a relatively wide readership with an array of images which fully document and interpret the evidence survey work at a landscape scale tends to deal with palimpsests here descriptive sections are set within a thematic structure designed to explore the changing use and significance of different areas over time the results shed important new light on the character and extent of known prehistoric sites and ceremonial monuments but they also document the afterlives of these and other places and their relation to the lived landscapes of the historic and more recent past in tracing the changing configuration of the world heritage area we can begin appreciate this landscape as an artifact of several millennia of dwelling working land attending to wider worlds and to the past itself

landscape protection management and planning entail rights and responsibilities for everyone the council of europe landscape convention aims to promote the protection management and planning of landscapes and to organise international co operation in this field it applies to the entire territory of the contracting parties and covers natural rural urban and peri urban areas it concerns landscapes considered outstanding as well as everyday or degraded areas this publication presents thoughts and proposals for the implementation of the convention and addresses a mosaic of key issues related to its future it forms part of a process of reflection on major themes concerning the living environment

includes a thorough review of each chapter s key issues and concepts review of key terms and references to figures in the text
