since the summer of 1973 when i became a burroughs research fellow my life has been very different from what it had been before the daily routine changed instead of going to the university each day where i used to spend most of my time in the company of others i now

went there only one day a week and was most of the time that is when not travelling alone in my study in my solitude mail and the written word in general became more and more important the circumstance that my employer and i had the atlantic ocean between us was a further incentive to keep a fairly complete record of what i was doing the public part of that output found its place in what became known as the ewd series which can be viewed as a form of scientific correspondence possible since the advent of the copier that same copier makes it hard to estimate its actual distribution i myself made about two dozen copies of my texts but their recipients were welcome to act as further nodes of the distribution tree the decision to publish a selection from the ewd series in book form was at first highly embarrassing but as the months went by i got used to the idea as soon as some guiding principles had been adopted preferably not published elsewhere as varied and as representative as possible etc

baudelaire s media aesthetics situates charles baudelaire in the midst of 19th century media culture it offers a thorough study of the role of newspapers photography and precinematic devices in baudelaire s writings while also discussing the cultural history of these media generally the book reveals that baudelaire was not merely inspired by the new media but that he played with them using them as frames of perception and ways of experiencing the world his writings demonstrate how different media respond to one another and how the conventions of one medium can be paraphrased in another medium accordingly baudelaire s media aesthetics argues that baudelaire should be seen merely as an advocate of pure poetry but as a poet in a media saturated environment it shows that mediation montage and movement are features that are central to baudelaire s aesthetics and that his modernist aesthetics can be conceived of to a large degree as a media aesthetics highlighting baudelaire s interaction with the media of his age baudelaire s media aesthetics discusses the ways in which we respond to new media technology drawing on perspectives from walter benjamin and giorgio agamben combining detailed research with contemporary theory the book opens up new perspectives on baudelaire s writings the figure of the flâneur and modernist aesthetics

this book provides a highly original approach to the writings of the twentieth century german philosopher walter benjamin by one of his most distinguished readers it develops the idea of quote working with quote benjamin seeking both to read his corpus and to put it to work to

show how a reading of benjamin can open up issues that may not themselves be immediately at stake in his texts the defining elements in benjamin s writings that andrew benjamin isolates history experience translation technical reproducibility and politics are put to work that is their utility is established in engaging the works of others the question is how utility is understood as andrew benjamin argues utility involves demonstrating the different ways in which benjamin is a central thinker within the project of understanding the nature of modernity this is best achieved by noting connections and points of differentiation between his work and the writings of adorno and heidegger however the more demanding project is that working with benjamin necessitates deploying the implicit assumptions within his writings as well as demanding of his formulations more than is provided by their initial presentation what is at stake is not the application of benjamin s thought rather what counts is its use working with benjamin engages with the themes central to benjamin s work with deftness daring and critical insight while at the same time situating those themes within current academic and cultural debates

this book argues that the overlooked ideas of josé martí and ernesto che guevara explain recent politics in latin america and the caribbean but also even more significantly offer a defensible alternative direction for global development ethics

discusses the spanish artist diego velazquez and explores the mysteries presented by his paintings this title features essays that looks at the changing relationship between velazquez and his patron philip iv it also explores the problem of attributions and the related issue of velazquez s innovative technique
