this book constitutes the proceedings of the 17th china national conference on computational linguistics ccl 2018 and the 6th international symposium on natural language processing based on naturally annotated big data nlp nabd 2018 held in changsha china in october 2018 the 33 full papers presented in this volume were carefully reviewed and selected from 84 submissions they are organized in topical sections named semantics machine translation knowledge graph and information extraction linguistic resource annotation and evaluation information retrieval and question answering text classification and summarization social computing and sentiment analysis and nlp applications

data driven and model based methods for fault detection and diagnosis covers techniques that improve the quality of fault detection and enhance monitoring through chemical and environmental processes the book provides both the theoretical framework and technical solutions it starts with a review of relevant literature proceeds with a detailed description of developed methodologies and then discusses the results of developed methodologies and ends with major conclusions reached from the analysis of simulation and experimental studies the book is an indispensable resource for researchers in academia and industry and practitioners working in chemical and environmental engineering to do their work safely outlines latent variable based hypothesis testing fault detection techniques to enhance monitoring processes represented by linear or nonlinear input space models such as pca or input output models such as pls explains multiscale latent variable based hypothesis testing fault detection techniques using multiscale representation to help deal with uncertainty in the data and minimize its effect on fault detection includes interval pca ipca and interval pls ipls fault detection methods to enhance the quality of fault detection provides model based detection techniques for the improvement of monitoring processes using state estimation based fault detection approaches demonstrates the effectiveness of the proposed strategies by conducting simulation and experimental studies on synthetic data
